

000 75 (1)

Omineca M.D.**OPEN FILE**

13. Fraser Lake.
14. Nechako River, north from confluence of Cheslata River.
15. Sustut River, tributary of Skeena River.

44

Liard M.D.

16. Liard River, north of Lower Post.
17. Liard River, mouth of Hyland River.
18. Liard River, near mouth of Coal River.

Most of these occurrences are briefly described in Dowling's "Coalfields of British Columbia" (G.S.C. Memoir 57), 1915.

We have a considerable file on Hat Creek.

The Graham Island, Skonun Point deposits we described in G.S.C. Memoir 88, Geology of Graham Island by J.D. Mackenzie 1916. B.C. Dept. of Mines Bulletin 54 "Geology of the Queen Charlotte Islands" by A. Sutherland-Brown should also be consulted.

There is a file on the Ouesnel-Fraser River occurrences. This coal is doubtfully lignitic, perhaps sub-bituminous.

The Fraser Lake lignitic occurrences we briefly reported on in the 1922 Annual Report & some analyses given (see file).

Catalogue of lignite or lignitic coal  
Occurrences in British Columbia.

Kamloops M.D.                      44

1. Hat Creek.
2. Kamloops area (near the east end of Kamloops Lake).

Fort Steele M.D.

3. Bull River (near mouth.)

Skeena M.D.

4. Graham Island, Skonum Point.

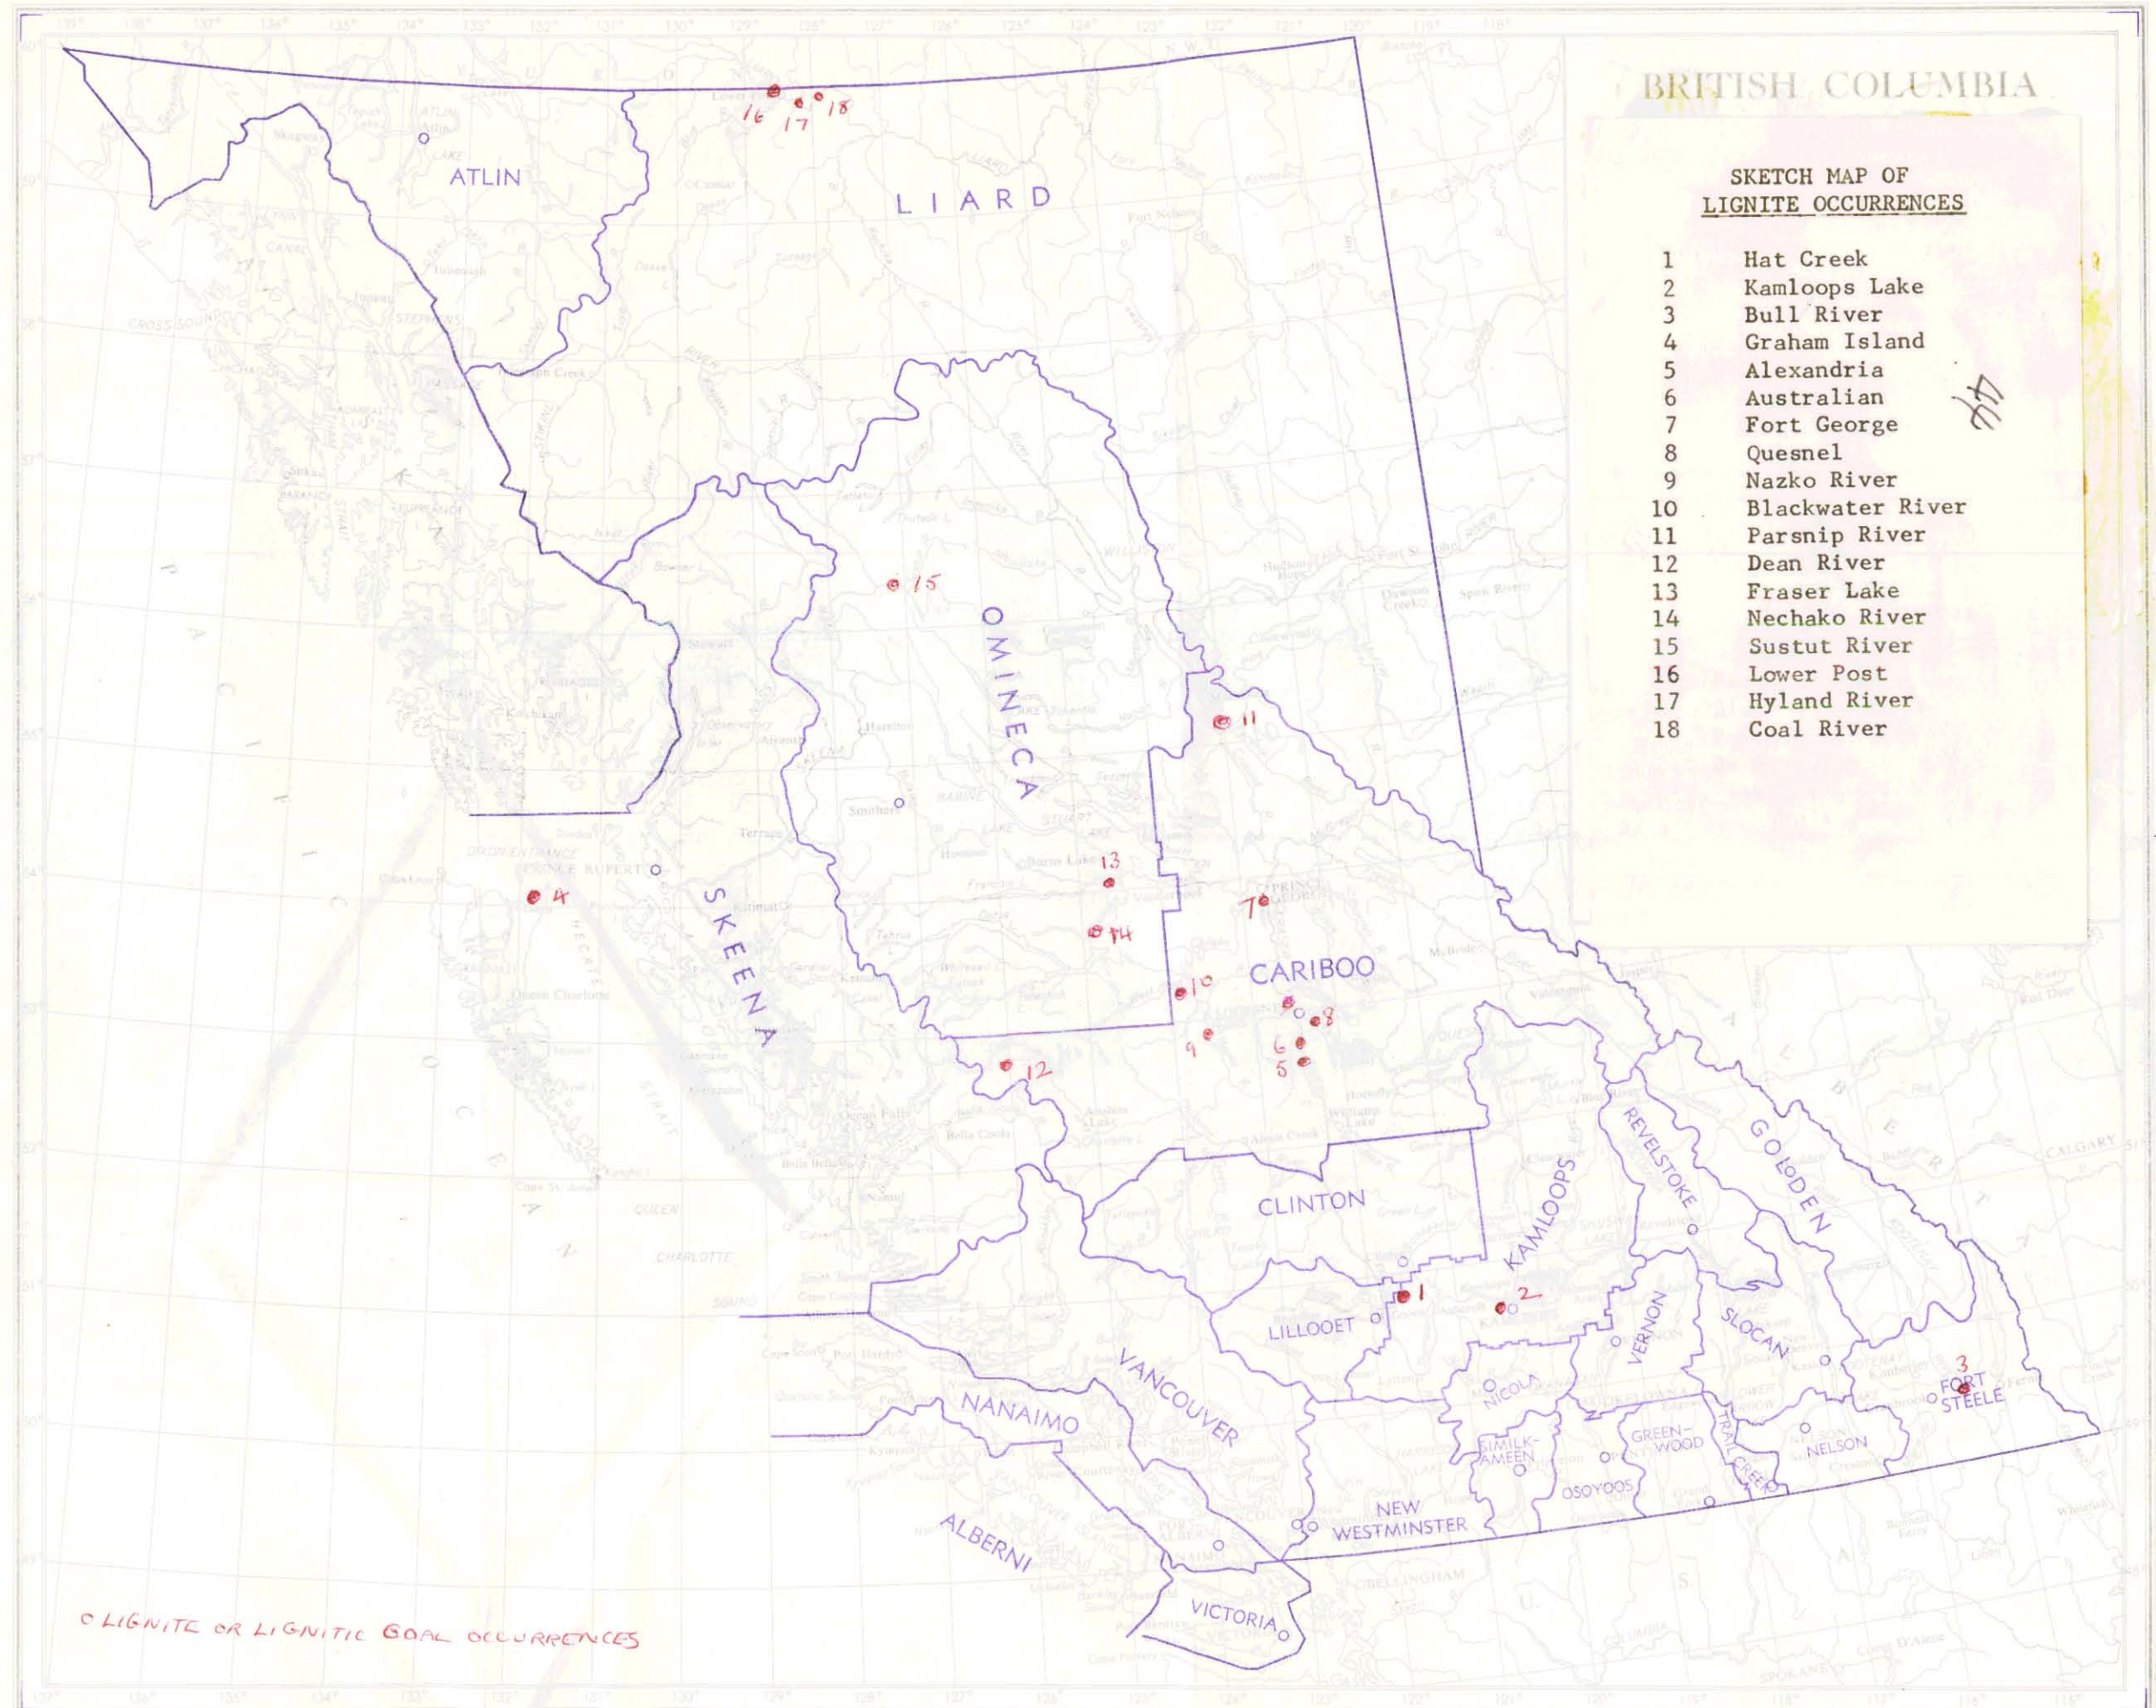

Cariboo M.D.

5. Fraser River                      Alexandria.
6.                      "                      "                      Australian
7.                      "                      "                      3 miles below Fort George
8. Quesnel River                      East bank 1 mile N. of Quesnel.
9. Nazko River                      Below Cinderella Mountain.
10. Blackwater River                      In upper canyon.
11. Parsnip River                      left bank close to mouth of Pache River.
12. Kookasganko River,                      a tributary of Deem River south of  
Tanyabuntkut Lake.
