DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

Map 1234 A indicates the area is underlain by Cretaceous and/or (?) Jurassic intrusives of hornblende-biotite quartz monzonite of the Goat Creek-Halifax Creek stock.

HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

The Crown-grants are located at about 6,000' elevation on the north side of Goatcanyon Creek some 6 miles east of the Lower Arrow Lake community of Burton; the summit of Tillicum mountain lies one mile farther east.

The Molly, Little Joe and Molly Fraction (Lots 2727-2729 respectively) were Crown-granted to Columbia Cariboo Gold Mining Company, Limited Liability in 1898. The extent of work carried out is not known; the claims subsequently reverted to the Crown.

The ground was overstaked as the Til 4 claim (18 units) in 1980 under a joint venture by Esperanza Explorations Ltd and Welcome North Mines Ltd. Welcome North withdrew from the joint venture in 1982 and La Teko Resources Ltd optioned a 50.4% share interest in Esperanza.
