HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

According to Cairnes (1935, p. 227): "The Keno property, comprising one or more claims held by location is about 3,500 feet above and 4 miles by trail southeast of Baylock. The workings include three adits, of which the lower two were inaccessible in 1925."

OWNER OR OPERATOR/PROPRIÉTAIRE OU EXPLOITANT

DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

This property is underlain by grey limestone and dark calcareous argillites of the Slocan series. Very little mineralization was seen in the workings when examined by Cairnes in 1925, but he reports that the dump contained specimens of clean galena and others of vein quartz carrying galena associated with sphalerite and grey copper (Cairnes, 1935, p. 228).

Silver.

HISTORY OF PRODUCTION/HISTORIQUE DE LA PRODUCTION

The only production registered from this property was in 1921, when 3 tons of ore, yielding 150 ounces of silver and 3,000 pounds of lead was shipped.
