DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

The country rocks are argillites, cherts, limestones and schists of the Milford group. They dip to the west at about 45°. The deposit has not been described so its nature or the amount of development work done on it are not known. Apparently the showing is small and has not warranted much development work.

This is one of a number of claims lying between the Florence and Silver Glance properties. The claim was Crown-granted to The Laurier M. & M. Co. in 1899. Owner of the property in 1949 was E. Emilson. The last record of work was in 1951.
