

NAME OF PROPERTY CUCKOO

OBJECT LOCATED - West shaft - from BCI 82 G/N - 28

UNCERTAINTY IN METRES 300. Lat. 49°30'12" Long. 115°20'24"

Mining Division Fort Steele District Kootenay

County Township or Parish

Lot Concession or Range

Sec Tp. R.

HISTORY OF EXPLORATION AND DEVELOPMENT

The showings are located on the east side of the Bull River about 12 miles due west of Fernie.

Three claims, the Cuckoo, Twilight, and Molly Bawn were owned in 1898 by Geo. Watson and Jay Usher of Fort Steele and Geo. Huggarth of Elko. Exploration work was done in 4 short adits, the longest being 50 feet in length.

OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

Map 11-1960 indicates the area is underlain by Precambrian Creston formation.

The country rock is composed of shales and quartzites dipping N. 25° E. at an angle of 17 degrees. The measures are cut by the two large igneous dykes, probably porphery, some 400 or 500 feet apart, parallel and in a general east and west direction, dipping nearly vertical.

Two adits on the Twilight claim exposed slight mineralization, chiefly galena. (Report of Minister of Mines, 1898, p. 1005).
