Jumbo

In 1889 it was stated that 3 tunnels, 100, 72 and 40 feet long, respectively, had been driven on the vein and that 600 tons of ore were piled on the dump.

In 1893 it was reported that a carload of ore had been shipped to Scotland and that hundreds of tons of ore assaying from 20 to 1,100 oz/ton silver remained on the dumps.

In 1899 workings consisted of 2 tunnels, 110 and 130 feet in length, respectively. At that time the dump contained 180 tons of concentrating ore. The concentrates are said to have averaged 320 oz/ton silver and \$5/ton in gold.

North Star

The North Star claim is located in Ground Hog Basin, about 1 mile from the Jumbo. It was reported that a good showing of argentiferous galena occurred on the property and that a tunnel, 140 feet in length, had been driven to intersect the vein.

DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

The showing on the Jumbo claim consists of a vein of quartz, 3 to 9 feet in width, carrying galena and pyrite.
