REMARKS

B.C. Dept. of Mines Bull. No. 3, 1917, p. 16, 17.

Iron Ores in Can. Vol. I, E.G.S. No. 3, 1926, pp. 191-198.

The deposit at present indicated is not large but the tenor of the ore is high. The iron content on numerous samples is over 60% with a low silica, sulphur and phosphorus content.

The probable and possible ore is estimated at only 55,000 tons. Diamond drilling and underground development are required to determine potential value of deposit.
