DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

It is reported that prospecting done on the Horseshoe claim indicates a rather extensive deposit of low-grade copper in mineralized schist at the contact between micaceous schist and granite.

HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

The claim is situated on McDonald Creek on the west side of Howe Sound. It has been reported that the claim is convenient for transportation and that the showings are good enough to warrant much more thorough prospecting than has been done. (A.R., B.C. 1926, p. 330).
