MAP SQUARE B9.

No. **92 I/15**

NAME OF PROPERTY (Kamloops Mercury Mines Ltd.)
(Hardie Mountain). **KAMLOOPS LAKE NORTH**

NEAREST POST OFFICE Kamloops, B.C.

LOCATION North side of Kamloops Lake, on Hardie Mt.
Mining Division Kamloops District Kamloops.

County Township or Parish
Adjoining On West & 1000' below the Mercury & Hg. Group (Sterrit).
Concession or Range, and Lot

L.S. Sec. Tp. R.

OWNERS OR OPERATORS AND ADDRESS
Hardie Cinnabar Mines Ltd.
Kamloops Mercury Mines Ltd., (Secy) R.J. Neville, 1500 Royal Bank
Building, Vancouver, B.C.

DESCRIPTION OF DEPOSIT
Ore or substance Cinnabar.

Character of Deposit Narrow fracture zones carrying dolomite veins
and cinnabar, and disseminated cinnabar deposits. Occasional
patches of high grade ore in the former type.

Country Rock Volcanic rocks, mostly breccias, in part dolomitized.
**Feldepar porphyry, andesite, tuff, breccia, and basalt
cut by small bodies of granite.**

Associated minerals of value None.

DEVELOPMENT WORK Six adits, five now open which total
574 feet, eight open cuts, and 4 shafts. These are widely
scattered into three main groups.

Some stripping with a bulldozer in 1940

Equipped
Not equipped

PRODUCTION None.

Material shipped

Date of first shipment

TRANSPORTATION
Shipping point Copper Creek.

Distance from mine ~~Eight~~ **Four** miles of bed road.

Carrier Truck.

(Description of property & development).

Cockfield - G.S.C. Mem. 249 - pp 99-100

Insufficient information on which to base a conclusion.
Most of the work is off the principal mineral zone. Present
holders apparently do not propose to develop the property.
Showings do not look very encouraging but probably ~~warrant~~ ^{would need}
some further investigation.

Visited by H.M.A. Rice, July 1940.

Discovered in 1895. Underground work commenced in 1896
and continued in 1898. Most extensive work carried out in
1902. All five adits showed low-grade ore and open-cuts
showed 2 to 3 per cent mercury.
