SHULAPS RANGE

## HISTORY OF EXPLORATION AND DEVELOPMENT

OBJECT LOCATED—Geographic description of showing.

UNCERTAINTY IN METERS -750. Lat. 50°55' Long. 122°32'30"

Mining Division Lillooet District Lillooet

County Township or Parish

Lot Concession or Range

Sec Tp. R.

## OWNER OR OPERATOR AND ADDRESS

## DESCRIPTION OF DEPOSIT

Large concentrations of chromite are exposed in the lower part of a serpentinite belt, northeast of Marshall Creek, midway between Brett Creek and Marshall Lake at about 5,500 feet elevation. The serpentinite belt is 900 feet wide and highly sheared. The rocks in immediate contact with the chromite are light-coloured and talcose. Most of the chromite is contained in eight or more bands and lenses whose aggregate area is about fifty square feet. Outcrop samples assay 57.43% Cr<sub>2</sub>O<sub>3</sub>, 5.08% Fe<sub>2</sub>O<sub>3</sub> and 12.09% FeO. Smaller deposits are found west and northwest of this showing.

Associated minerals or products of value
