This property is composed of the Midas and Jim Groups of claims that were explored by the Ampora Mining Co., Inc. which were abandoned in 1940.

In 1949 the partnership of Godville and Pickering made a Crosscut on the old shaft in an endeavour to locate a previous explored Vein. 1949 - 15 tons Mill and Wifley table were installed but there was insufficient concentrates to continue treating ore, operation stopped.

1954 - see B.G. Bull. # 34. for assays.
