OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

The deposit shows sporadic pyrite and chalcopyrite mineralization in a quartz stockwork, localized with apophyses of the Granite Mountain quartz diorite pluton. The stock has intruded greenstone and sedimentary rocks of the Permian Cache Creek Group.

HISTORY OF EXPLORATION AND DEVELOPMENT

The property is located 4 miles ESE of McLeese Lake and 7½ miles W of Tyee Lake, between elevations 2,000 and 3,500 feet.

In 1968, a geophysical survey was carried out by Midnight Consolidated Mines Ltd. on the BJ 17, 19, 21 and 33 to 66, JP 6, 17 and 18, Barb 1 to 2, Viv 1 to 10 and Claude 1 to 8 Fraction claims. In 1969, the company reported completion of an electromagnetic survey and 3 diamond drill holes totalling 1,000 feet.

In 1972, Mt. Hyland Mines Ltd. acquired the 41 BJ and JP claims due to an agreement with J. Lefoley, B. Lefoley and E. Black. In 1973, work reported was 1,384 cubic yards of stripping, soil sampling, a magnetometer survey and 3 percussion drill holes totalling 650 feet.

By 1974, Mt. Hyland had reduced the number of claims to nine.
