OWNER OR OPERATOR/PROPRIÉTAIRE OU EXPLOITANT

DESCRIPTION OF DEPOSIT/DESCRIPTION-DU GISEMENT

The deposit consists mainly of zinc blende and galena mineralization carrying fair silver values, occurring in a quartz-barite gangue in a limestone country rock close to intrusive andesite. The values appear to be low-grade.

HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

This property is located on the west side of the Noosgulch River some 20 miles northeast of Bella Coola.

The Nifty, Nifty Nos. 1-5, and Thunder claims were apparently staked by W.C. Merkel prior to 1930. The Consolidated Mining & Smelting Company of Canada Limited held an option on the property during 1930 and carried out extensive stripping and trenching. The property subsequently reverted to the original owner.

Handwritten note: Licence No. 1000000 (40 74 81)
