OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

Chalcopyrite and molybdenite mineralization occurs as fracture fillings in monzonite and quartz monzonites in contact with Takla Group volcanic rocks.

HISTORY OF EXPLORATION AND DEVELOPMENT

The property is located approximately 3 miles north of Chelaslie Arm at elevations of 3,500 to 4,000 feet.

The claim group, comprising WT 1-42, 1-12 Fractions, was owned in 1971 by Noranda Exploration Company, Limited. The company's work during that year included geological mapping, 730 geochemical samples, 14.2 line-miles magnetometer survey, 4 line-miles induced polarization survey, and 3.8 line-miles electromagnetic survey covering WT 1-16 and WT 1-6 Fractions.

In 1972, Noranda held WT 1-20, 25-32, WT 1-6 and 9-11 Fractions. Geological and topographical mapping, as well as 7.2 line-miles of induced polarization surveying was done on the property.

Associated minerals or products of value - Copper.
