

NAME OF PROPERTY SC, SR (STARR)

OBJECT LOCATED - Plot on Map 44-23.

UNCERTAINTY IN METRES 1,000. Lat. 54°27'45" Long. 127°30'30"

Mining Division **Omineca** District **Range 5 Coast**

County Township or Parish

Lot Concession or Range

Sec Tp. R.

OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

Two parallel crushed zones, 2 and 3 feet wide, occur in Hazelton andesites near a granitic contact. Mineralization includes pyrite and chalcopyrite in a gangue of quartz, calcite, and altered country rock.

HISTORY OF EXPLORATION AND DEVELOPMENT

The showings are located near the head of Starr Creek approximately 35 miles west of Houston.

Claims were staked on these showings in about 1906 but there is no report of work done at that time.

Telkwa Mountain Mines Ltd. acquired 48 claims on the SC, SR, and PG groups in 1948. The property was subsequently expanded to 96 claims in the SC, SR, PG, BL, HK, TK, and R groups. The SC and SR groups covered the original Starr showings. An airborne reconnaissance geophysical survey was carried out in 1968. Exploration work during 1969-1970 included geological mapping, geochemical soil and rock surveys, an induced potential survey over 12 line-miles, 1,600 feet of trenching on SR 13 and SR 14, stripping on SR 12, and 1,000 feet of diamond drilling in 3 holes on SC 14.
