DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

The deposit is a mineralized zone, at least 8 feet wide, containing malachite and pyrite with minor azurite. It lies in a 200-foot band of sheared, carbonatized, silicified, and pyritized, interbedded argillite and andesite of the Cache Creek group. The mineralized zone is also much broken by faults and veined by quartz. A grab sample assayed 4.83% copper and 0.005 ounce of gold a ton. (Armstrong, 1949).

HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

This occurrence is located at the 5,500 foot elevation on the south slope of a peak about 1 mile north of the northeast end of Nina Lake, and some 54 miles northeast of Takla Landing.
