HISTORY OF EXPLORATION AND DEVELOPMENT  
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

Boulder Creek flows easterly into the Manson Lakes, some 7 miles southeast of the Manson Creek settlement. Individual prospectors have worked intermittently on the creek for many years. In 1900, a total of 16 placer claims were held on the creek and the finding of coarse gold was reported. Further work was reported by A.E. Floyd in 1935 and by a number of individuals in 1941.

Mr. R.L. Baier & associates attempted, without success, to recover placer gold in the late 1960's. The discovery of scheelite in the placer concentrate shifted their interest to the search for tungsten. They incorporated Northern Tungsten Mines Ltd. in October 1970. (See 93 N/9, Ref. Pb 2).

HISTORY OF PRODUCTION/HISTORIQUE DE LA PRODUCTION

The recorded production from Boulder Creek for the period 1936-1940 is 110 ounces of placer gold.
