NAME OF PROPERTY MO (GOLDWAY)

OBJECT LOCATED-'D' vein.

UNCERTAINTY IN METERS -500. Lat. 56°31'50" Long. 126°14'30"

Mining Division Omineca District Cassiar

County Township or Parish

Lot Concession or Range

Sec Tp. R.

OWNER OR OPERATOR AND ADDRESS

HISTORY OF EXPLORATION AND DEVELOPMENT

The property is located at elevations of 5,000 to 7,300 feet on a ridge that extends eastward from Goldway Peak, approximately 100 miles northeast of Hazelton.

Numerous claims were staked in this vicinity in 1946. The Goldway 1-5, 7-8 claims were recorded in the name of M.G. Kerr, of Vanderhoof. Goldway Peak Mines, Limited, was incorporated in February 1947 to acquire the property. Work during 1947 included geological mapping, the driving of a short adit, trenching, and sampling. No further work was done and the claims lapsed.

In March 1973 the showings were restaked by John Kruzick as the MO 1-20 claims. San Jacinto Explorations Limited optioned the property in February 1974.

DESCRIPTION OF DEPOSIT

The rocks underlying the property are Permian andesitic flows and tuffs with local areas of greenstone, intruded extensively by dioritic phases of the Jurassic Omineca Intrusives. Quartz has been deposited in both the intrusive and the volcanics and appears in two types of deposition: the one type, comprising lenses and veins, is mineralized with pyrite only and carries no values; the other type comprises gold-bearing quartz veins in the diorite. These veins split, pinch and swell, and seldom exceed 3 feet in width. They are characteristically rusty, friable, and mineralized with pyrite, galena and gold. Five veins, designated A to E, have been found on the ridge which extends eastward from Goldway Peak. Sampling in 1947 indicated three separate concentrations of gold-bearing quartz on the "A" vein and one on the "C" vein, as follows:-

DESCRIPTION OF DEPOSIT (continued)

"A" vein - (1) 0.29 oz./ton in gold over a 2.1 ft. width and a length of 180 ft.  
 (2) 0.94 oz./ton in gold, width of 2.3 ft., length of 80 ft.  
 (3) 0.88 oz./ton in gold, width of 2 ft., length of 50 ft.  
 "C" vein - (1) 0.54 oz. ton in gold, width of 1.72 ft., length of 90 ft.
