DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

The quartz vein on the adjacent Bear property (103 I/15, AU 4) continues northeast into the Gold Cap claim and has been exposed by trenching for about 300 feet beyond the Bear claim. It ranges from 2 to 6 inches in width and follows fairly closely the bedding plane of a narrow seam of soft, black, carbonaceous shale with overlying, impure sandstone. The vein is in places heavily stained and honeycombed by the leaching out of pyrite. An unoxidized sample containing a little pyrite and galena, weighing 1 pound and 13 ounces, assayed: gold, 0.06 ounce a ton; silver, 0.54 ounce a ton. Four hundred feet farther northeast a number of pits trace a similar vein for 100 feet.

HISTORY OF EXPLORATION AND DEVELOPMENT  
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

The showings are located at about 4,400' elevation on the north side of Maroon Mountain, 5 miles east of the north end of Kitsumkalum Lake and some 20 miles north of Terrace.

The Gold Cap claim was owned by James Carruthers, of Terrace from about 1923 until 1935. Trenching was done to trace the vein.
