HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

The property is located at the 3,800 elevation on the south side of Wesach (Goat) Mountain some 22 miles north-northwest of Terrace.

The Marmot and Sunlight claims were owned by A. Egan and A. McKinnon of Terrace, from prior to 1920. Assessment work was carried out each year until about 1928. The workings at that time included a 17' shaft and a drift adit about 95' long in length.

OWNER OR OPERATOR/PROPRIÉTAIRE OU EXPLOITANT

DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

Map 1136 A indicates the area is underlain by Upper Jurassic and (?) Lower Cretaceous Bowser Group sedimentary rocks. A bedded quartz vein in argillite strikes N74°E and dips north into the hill at 35° to 40° and is exposed on surface for several hundred feet. It varies in width from 1" to 12' and is sparsely mineralized with pyrite and chalcopyrite, with a few inches on the hanging-wall mineralized with sphalerite and galena. An assay of this material in 1920 reportedly gave 40% lead, 20 oz/t silver, \$2 in gold, and 3% copper.

Reports of Minister of Mines, British Columbia: 1920, p. 42[†]; 1922, p. 49; 1923, p. 48; 1924, p. 48; 1926, p. 73; 1927, p. 64; 1928, p. 73^{††}.
