DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

Work in 1914 was reportedly done on northerly striking fractures containing minor chalcopyrite in a quartz gangue. An average sample from an open cut assayed: Gold, .03 oz/t; silver, 0.8 oz/t; copper, 3.4%.

Work in the 1930's was reportedly done on a fracture zone in Triassic (?) andesitic volcanics and on a north dipping, 6" wide quartz vein containing coarse pyrite. Assays gave only a trace of silver and no gold.

HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

The showings are located at about 1,800' elevation on the southeast side of Kitselas Mountain some 8 miles northeast of Terrace.

The Old Timer group of 4 claims was owned in 1914 by C. Clifford and associates. Trenching was reported.

The Oxford group of claims, located in the same vicinity, were owned in the 1930's by H.R. Leacock, of Prince George. A number of test pits were sunk at that time.
