DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

The showings are not clearly outlined but appear to consist of disseminations of pyrite and chalcopyrite in rocks of the Hazelton group near the contact of the Coast Range granite. Mineralization is spread over a large area.

HISTORY OF EXPLORATION AND DEVELOPMENT  
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

The showings are at about the 3,200 foot elevation on the crest of the ridge between the Portland canal and the head of Georgie river, about 7 miles south-southwest of Stewart.

The 8 claim B.C. Verde group was located in the fall of 1920 by H. McGuire, of Stewart. The adjoining Iron Cap group of 6 claims, also owned by McGuire, was apparently located in 1920. The only work reported was open cutting on the B.C. Verde group.

The Fraser group of 2 claims was staked adjoining the above groups by George Fraser in 1921; no work was reported on this group.
