OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

An open cut exposes sandstone striking N30°E (mag.) and dipping northwest at about 40 degrees. In places quartz follows the bedding-planes of the sandstone. A transverse shear striking N50°W and dipping steeply southwest is occupied by a lenticular quartz seam with an average width of 18 inches. It is sparsely mineralized with pyrite and a very little galena.

Associated minerals or products of value

HISTORY OF EXPLORATION AND DEVELOPMENT

This property is located immediately east of Woodcock Station, on the north side of and within 900 feet of the railway-track.

The Rosalea claim was owned in 1929 by W.C. Little and David Wilson. Open cutting was reported.

Mineral Resources Branch, Department of Energy, Mines and Resources, Ottawa.
