DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

The showing consists of a small quartz vein in granitic rocks of the Coast Range intrusives. The vein strikes northwesterly, dips 35° south, ranges from 6 to 18 inches in width, and is traceable for about 50 feet on the surface. The vein filling consists of quartz, fragments of wall rock, and in places contains galena and a small amount of the common sulphides.

N.T.S. AREA 104 B/1 RÉGION DU S.N.R.C. REF. PB 4

HISTORY OF EXPLORATION AND DEVELOPMENT HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

British Columbia

This property is located on the west side of the Salmon River glacier, near the British Columbia-Alaska boundary, about ½ mile north of Cantu Mountain.

The showings were staked by Jean Bartholf who subsequently sold the property to H.A. Hallum, of Seattle. In 1927 a crosscut adit was being driven under contract and was expected to reach the vein in about 100 feet.
