County	Township or Parish		
Lot	Concession or Range		
Sec	Tp.	R.	

OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

Associated minerals or products of value

HISTORY OF EXPLORATION AND DEVELOPMENT

Faulkner Creek flows northerly into Kutcho Creek and the Turnagain River, some 50 miles east of Dease Lake.

In the lower section of the creek ground sluicing was carried out by Percy Peacock in 1933. This section is composed of deep glacial drift, with a hummocky morainal topography, and is unfavourable for placer gold concentrations.

Mineral Resources Branch, Department of Energy, Mines and Resources, Ottawa

511920 *

HISTORY OF PRODUCTION

Total recorded production, for the period 1926-1930, is 8 ounces of placer gold.
