HISTORY OF EXPLORATION AND DEVELOPMENT

The property is located near Tedideech Lake, some 55 miles west of the north end of Dease Lake.

The claims were originally staked as an extension of the Opal property (104 J/13, Ni 1) and nickel was sought without success. Consolidated Northland Mines Limited carried out geological work on the Ace group in 1958.

OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

The claims are mainly underlain by sediments (Cache Creek). Isolated specks of pyrite and chalcopyrite occur in a feldspar porphyry intrusion.

Associated minerals or products of value

Mineral Resources Branch, Department of Energy, Mines and Resources, Ottawa.
