NAME OF PROPERTY **NAHLIN RIVER**

OBJECT LOCATED **-showing.**

UNCERTAINTY IN METERS **-500.**

Lat. **58°49'** Long. **131°56'20"**

Mining Division **Atlin** District **Cassiar**

County Township or Parish

Lot Concession or Range

Sec Tp. R.

OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

Chalcocite and native copper are reported to occur in veins and stringers in altered serpentine; selected samples assayed better than 15 per cent copper. An adjacent band of mineralization is reported to have assayed 0.48 per cent nickel.

Associated minerals or products of value - **Nickel.**

HISTORY OF EXPLORATION AND DEVELOPMENT

The showing is located on the west side of the Nahlin River about a mile south of Chastot Creek.

Prospector Sigmund Muldal discovered the showing in 1955 and returned in 1956 to stake the ground for Canadian Explorers Limited. Trenching and diamond drilling in 1956 and 1957 was apparently confined to the Opal Lake Nickel showing  $5\frac{1}{2}$  miles to the southeast (104 J/13, Ni 1).

Mineral Resources Branch, Department of Energy, Mines and Resources, Ottawa.
