## NAME OF PROPERTY

KID, GRIZZLY

OBJECT LOCATED -showing on NW side of Kid 1 claim.

UNCERTAINTY IN METRES 300. Lat. 58°14.5' Long. 131°53.0'

Mining Division Atlin District Cassiar

County Township or Parish

Lot Concession or Range

Sec Tp. R.

## OWNER OR OPERATOR AND ADDRESS

## DESCRIPTION OF DEPOSIT

Upper Triassic volcanic rocks are intruded by diorite-quartz diorite and minor syenite intrusions of the Late Triassic Kaketsa stock. Chalcopyrite and pyrite are disseminated in intrusive rocks and localized in shear zones in adjacent volcanic rocks.

## HISTORY OF EXPLORATION AND DEVELOPMENT

The property is located on the west side of the Sheslay River about 2½ miles southwest of its junction with the Hackett River, some 17 miles northwest of Telegraph Creek.

The Kid 1-12 claims were held by Kennco Explorations (Western), Limited, from 1960 to 1964. Work included geophysical and geochemical surveys, and diamond drilling of four packsack holes totalling 165 feet.

The Kid, and Grizzly 1-20 claims were held by the Colorado Corporation in 1970. Work during the year included geological mapping, a geochemical soil survey, trenching, and sampling. Cobre Exploration Limited, incorporated December 1971, acquired the Grizzly 1-20, Kid 1, and 15 claims in the Red group from Edward Asp and associates by an option agreement dated January 1972. Work during the year included geological mapping, a magnetometer survey over 7.7 line-miles, and a geochemical soil survey (104 samples). The option agreement was transferred in February 1974 to Ducanex Resources Limited and Brascan Resources Limited. During 1974 Ducanex and Brascan carried out a time-domain induced potential survey over 4 line-miles covering Grizzly 5-10, 15, 17, 19, and 1,902 feet of diamond drilling in 3 holes on Grizzly 6, 8, and 10.
