DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

The showing appears to lie nearly on line between the Silver Bird and Whitewater properties and are apparently on the same altered zone. The main showing is a width of 200 feet of volcanic rocks highly impregnated with pyrite. In places the pyrite is massive. It is replaced by some stibnite and chalcopyrite.

HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

This property lies about one mile southwest of the White-water property on Whitewater Mountain.

In 1933 the Silver Queen group, owned by J.D. McDougal and associates, was under option to the Alaska-Juneau Gold Mining Company. The company also had options on the Whitewater property and on the Silver Bird group, which lies along strike about a mile southwest of the Silver Queen. Most of the exploration work by the company was confined to the Whitewater and Silver Bird properties. The option was dropped in 1934.
