HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

This group of claims is located south of the Maid of Erin property, close to the valley of the Klehini River. Five claims, the Glacier, Idaho, Texas, Boundary, Mayflower, and Parrot, were located by Dan Sullivan in about 1914. Development work, consisting of open cuts and a shallow shaft, was carried on intermittently until about 1918.

OWNER OR OPERATOR/PROPRIÉTAIRE OU EXPLOITANT

DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

The showings consist of a mineralized band of limestones, bordered by altered argillites. The limestones in this zone have been almost completely replaced by metallic and non-metallic secondary minerals, mostly pyrrhotite, chalcopyrite, sphalerite, and galena in a gangue of garnet, actinolite, quartz, and calcite. Mineralization is exposed in the lower trench for a width of 60 feet and in the upper trench for a width of 20 feet. The percentage of chalcopyrite and galena is small in the sections exposed.

Associated minerals or products - Lead.
