

Geological Fieldwork

a summary of field activities
of the geological division,
mineral resources branch

1974

British Columbia Department of Mines and Petroleum Resources.

FOREWORD

Geological Fieldwork, 1974 is a new publication designed to acquaint the interested public with the preliminary results of the Geological Division as soon as possible after the field season. Fieldwork described includes reports of Project and District Geologists as well as those of graduate students whose work represents an integral part of the Division's projects. The reports are written mainly without the benefit of laboratory or extensive office studies. To speed publication, editing has been minimal and figures have been draughted by the authors. *Geological Fieldwork, 1974* is not designed to replace *Geology, Exploration, and Mining in British Columbia* which will continue as the comprehensive volume on the work of the Industry and of the Department.

A. Sutherland Brown,
Deputy Chief Geologist,
Mineral Resources Branch

TABLE OF CONTENTS

		Page
REPORTS OF PROJECT GEOLOGISTS		
Hoy, Trygve:	Zinc Deposits, Southeastern British Columbia	7
Preto, V. A.:	Geology of the Nicola Group between Missezula Lake and Allison Lake	9
Lefebure, David V.:	Stratigraphy and Copper Mineralization of the Nicola Group, Fairweather Hills	14
Christopher, P. A.:	Giant Mascot Mine	17
Northcote, K. E.:	Geology of the Northwest Half of Iron Mask Batholith	22
McMillan, W. J.:	Stratigraphic Section from the Jurassic Ashcroft Formation and Triassic Nicola Group contiguous to the Guichon Creek Batholith	27
Pearson, David E.:	Bridge River Map-Area	35
Garnett, J. A.:	Current Activity – Hogen Batholith	40
Meade, H. D.:	Geology of Germansen Lake Area	43
Carter, N. C.:	Property Examinations, West Central British Columbia	47
Church, B. N.:	Geology of the Sustut Area	51
Church, B. N. and Winsby, J.:	Dentonia Mine, Jewel Lake Area	56
Panteleyev, A.:	Galore Creek Map-Area	59
McMillan, W. J., Panteleyev, A., and Preto, V. A.:	Geochemical Sampling, Geology, and Magnetics of the Kaketsa Stock	63
REPORTS OF DISTRICT GEOLOGISTS		
White, Gordon P. E.:	South Central British Columbia	69
