

Geological Fieldwork

a summary of field activities
of the geological division,
mineral resources branch

1975

FOREWORD

This is the second year of publication of *Geological Fieldwork*, a publication designed to acquaint the interested public with the preliminary results of fieldwork of the Geological Division as soon as possible after completion. The reports are written without the benefit of extensive laboratory or office studies. To speed publication, figures have generally been draughted by the authors. A fuller account of the work of the Division will be presented in *Geology, Exploration and Mining in British Columbia, 1975*.

Technical editing of this publication was done by N. C. Carter and production editing and layout by Rosalyn J. Moir.

A. Sutherland Brown,
Chief Geologist,
Geological Division,
Mineral Resources Branch.
