Generating a Property Map in MapPlace 2

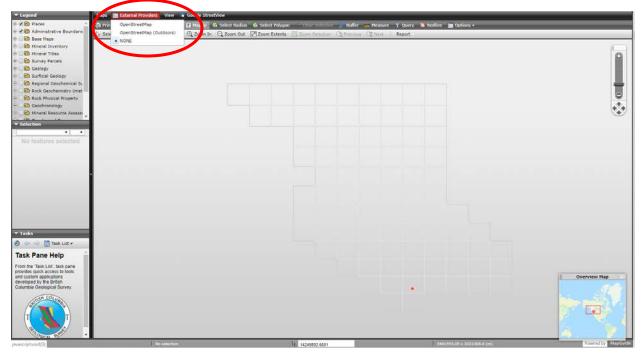

As a replacement for the ARIS MapBuilder, this guide outlines the steps to generate a Property Map in MapPlace2 using the Tasks, Redline, and Quick Plot tools.

For information on the operation and tools of MapPlace2, please refer to the MapPlace 2 User Guide (<u>IC2017-03</u>).

Step 1: Launch MapPlace 2

Step 2: Under External Providers - Select NONE

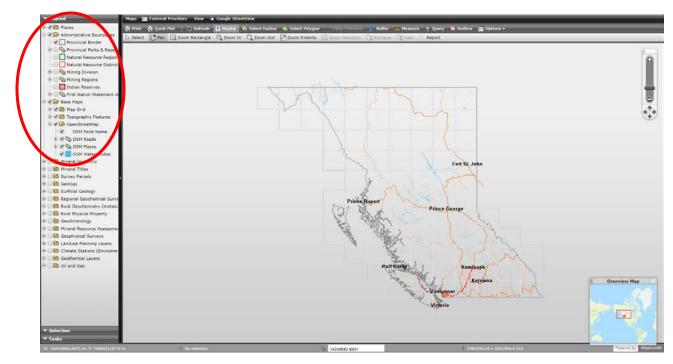

Expand Administrative Boundaries (click on + box)

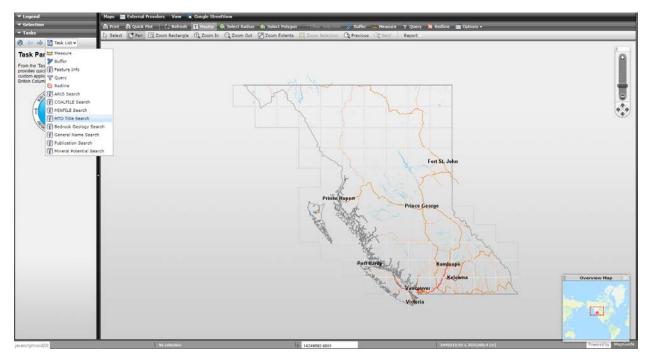

Turn on Provincial Border (click box to generate checkmark)

Expand and Turn on Base Maps

Expand and Turn on Open Street Map (may take a few moments to load)

Step 4: Tasks – Task List – MTO Title Search

Tenure Number: **Input the number** of the tenure at the centre of the property/work area, **click 'Go!'**

Tenure number One or more. For example: 222198,222491,592371)
Equal or W 🔻
Go!

Results List: click 'zoom to' Legend Selection Tenure shaded in red; generates 'MTO Query Tasks Result' layer in the legend 📳 Task List 🛩 MTO query result updated. There are 1 items returned from the query. Go Back Download KML. Download Excel. Your query result for: Tenure Number = 1061523 ZOOMTO TENURE_NUM CLAIM_NAME GRIZZLY ZoomTo 1061533

Step 5: Redline Tool – Manage Redline

Create New Redline: click 'SDF'

Add Redline – Digitize Redline: click 'Point'

Click on the map to specify the location of the point

Generates a red square (tough to see through the red shaded tenure)

Modify Redline – click to select '1: [no text]'

In dialog box below 'Modify Redline', type in the Property Name (to label the point created)

Click 'Update Text'

Click 'Close'
