

MINFILE NTS 082KNW - BEATON

Original release date: 2004

Researched and compiled by: B.N. Church, L.D. Jones, G. Payie, D. Houghton, and R. Pinsent

The Beaton map area, located in south-central British Columbia, contains 222 documented mineral occurrences, including 51 past producers. The map area includes the Beaton-Camborne mining camp, most of which was updated in 1998. See *Metallogeny of the Beaton-Camborne Mining Camp Lardeau District (NTS 082K12 & 13)*, by B.N. Church and L.D. Jones; article from *Geological Fieldwork* 1998, GSB Paper 1999-1, pages 193-222.

In April 2003, 26 occurrences, including 8 new occurrences, were updated in NTS 082K14; and 13 occurrences, including 1 new occurrence, were updated in the north part of NTS 082K11 map areas by G. Payie and D. Houghton. In March 2004, 97 occurrences, including new occurrences and a summary of the Geology of the Trout Lake Area were updated in the Trout Lake Area of NTS 082K11 by R. Pinsent.
