APPENDIX 1

Attached to and forming part of the
Contribution Agreement
between
the British Columbia Offshore Oil and Gas Team
and
the BC Seafood Alliance

Based on the attached budget, the BC Seafood Alliance will familiarize key players in the BC seafood industry with the issues relating to the impact of offshore oil and gas exploration off the West Coast on fisheries and aquaculture, so that they can make informed decisions about both risks and benefits and communicate information to others in the sector.

- Deliverables:
 - The organization will provide a scoping/research document identifying the issues, with the primary focus on seismic. The intent is to produce an independent research paper that can be used by both the seafood sector and the Offshore Oil and Gas Team that gives a credible, layperson's overview of the issues. A first draft of the scoping/research paper will be provided to the Province by January 7, 2004 and will be finalized and distributed to workshop participants a minimum of one week before the workshop.
 - The organization will organize and hold a one-day workshop focused on seismic effects and impacts, to take place no later than February 20, 2004. The Organization will recruit participants for the workshop (approx. 75 people). Best efforts will be made to secure the participation of the UFAWU, the Native Brotherhood of BC, the BC Aboriginal Fisheries Commission, the Pacific Salmon Harvesters Society and other parties identified by the organization or the Province as important to the process of consultation.
 - The organization will complete a final report analyzing the success of this type of forum in generating informed, balanced discussion of the issues, and an assessment of what other mechanisms or techniques would assist in meeting that goal. The final report will make recommendations regarding next steps, if any, and will be provided to the Province by February 28, 2004.
