

Offshore Technology Conference

BC Booth at OTC

The Offshore Technology Conference is an ideal venue to market goods and services to the offshore oil and gas industry worldwide. Each year OTC attracts more than 2,000 exhibitors and over 67,000 delegates from 110 countries. Fifty percent of the delegates are staff engineers, managers or supervisors and sixty-six per cent make the final buying decision for their companies.

For the fifth year, the British Columbia Government will be exhibiting at the show in partnership with industry. The theme of the 2008 Booth will be:

BRITISH COLUMBIA: CANADA'S UNTAPPED RESOURCE

The British Columbia booth will occupy prime space in the Canadian Pavilion: it will be located on a main aisle directly across from the Nova Scotia booth. It will be designed to highlight both BC's onshore and offshore oil and gas opportunities, our ocean engineering expertise, sub-sea equipment and services, and expertise at our research establishments and universities.
