BIBLIOGRAPHY

REMARKS

M.C. FILE 167 - T2 - 2 - 51

Surface outcrop of vein or shear zone has been traced for 600 ft, and is 11 ft. wide. In the tunnel the shear zone is 60 ft. wide and is reported to average 2% WO_3 . The vein was developed as a gold mine, but values were too low for working. The property is very old, the first Crown Granted Claim having been issued in 1869.

W. R. McC.
Nov. 26, 1947.
