Three placer mining leases were being developed in 1907.

"Gold and platinum occur in this stream in the ratio of about 2 to 1." (B.C.Rep.,1913.)

"The quantity of gold recovered has not been ascertained by the writer, who has been informed, though, that one cleanup witnessed gave very coarse gold and much platinum. It is stated that throughout the summer more platinum than gold was recovered; the largest nugget of gold found was worth \$10.60, calculated at the rate of \$17.75 an ounce."

(B.C.Rep.,1914.)
