OWNER OR OPERATOR/PROPRIÉTAIRE OU EXPLOITANT

North Pacific Mines Ltd.,
409 Granville St.,
Vancouver, B.C.

DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

Malachite, chalcopyrite, and pyrite occur in and adjacent to several northeasterly faults and shear zones which cut older and younger quartz diorites of the Guichon batholith and mostly dip to the northwest at moderate and high angles.

HISTORY OF EXPLORATION AND DEVELOPMENT
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

The main showings are located $3\frac{1}{4}$ miles east and slightly north of Bose Lake.

Deer Horn Mines Limited held the Whitches Brook group of 24 claims in this vicinity in 1956. Noranda Exploration Company Limited held the PG group of 99 recorded claims along and mainly west of Guichon Creek to the north of Witches Brook in 1962. This property was partly a relocation of the claims held by Deer Horne Mines Ltd. Geological, geochemical, and geophysical surveys were carried out during 1963.

The CL group, apparently staked by C.W. Dansey in 1964, was located partially on ground formerly part of the PG group. North Pacific Mines Limited carried out a program of trenching, soil sampling, magnetometer and geological surveying on the property during 1964. An induced polarization survey carried out during 1965 outlined an anomaly some 3,000 feet long over a width of 800 feet.
