 G.S.C. Field Report. K.C. McTaggart, Dec. 26, 1946.  
*912c. Mem # 267. 1951 - P 105*

*Saraford Developments Ltd. - Statement  
 of Material Facts, Aug/43*

The quartz vein extends up NW slope of Mount Roach, over the ridge, and some distance down SE flank of the mountain for an estimated length of about 1200 ft. Faults, which strike about east-west and dip at from 30° to 60° to the south, cut the vein into a number of segments. Quartz is very sparsely mineralized.
