PRODUCT	ANTIMONY	PROVINCE OR Brit TERRITORY	ish Columbia	N.T.S. AREA	92 J/15	REF. S	b 7
UNCERTAINTY IN M Mining Division County Lot Sec	-Head of Truax and Fergusson METERS-1,000. Lat. 50°48'		HISTORY OF EXPLORATION AND DEVELOPMENT These properties, referred to in a memo dated March 1946, by W.R. McClelland (File MR-Sb-301.00 - British Columbia) are all located in the area near the head of Truax and Fergusson Creeks. It is possible that the ground covered by these early prospects was incorporated into later antimony proper- ties in the area (see Grey Rock, 92 J/15, Sb 1; Rock Roy, 92 J/15, Sb 4; and Truax, 92 J/15, Au 9). The Commerce Group was owned by Messrs. J.G. Morrison and F. Bellevue and developed by a short adit and four open cuts. The B & M prospect was owned by Messrs. F. Billings and J.G. Morrison. Work included three open cuts and three short adits. The Stewart Group was owned by Arthur Le Clere and associ- ates of San Francisco. In 1941 they shipped 17 tons of hand- cobbed ore. George Matheson and Ethel Galloway owned the Birthday Group. A small amount of stripping was done on the property.				
lenses of stibu these lenses and also quartz ver gold and mixed picked assayed On the B & stibnite are for dykes. The deposite with narrow lend that is describe	M prospect, small shoots of bund in argillaceous quartzin t on the Birthday consists of nses of fairly massive stibut bed as andesitic lava, in par ole of carefully sorted ore n	nd granite. Few of length. There are tain arsenopyrite, al that could be not very high grade tes cut by andesite f quartz fissure veins ite in a country rock rt sheared and carbon-	Tamerind 1994	Resources Branch, Depart		nes and Resource	es, Ottawa
