OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

According to Leech (1953), asbestiform serpentinite intermediate between picrolite and true chrysotile was noted on Blue Creek, south of Petaskit Creek and at the head of Brett and Hog Creek in the ultrabasic rocks of the Shulaps Range. It is possible that one of these showings was staked by Hamil Silver-Lead Mines, Limited.

Associated minerals or products of value

Mineral Resources Branch, Department of Energy, Mines and Resources, Ottawa.
