

NAME OF PROPERTY

TAN

OBJECT LOCATED - Showing at NE corner of Tan 4.

UNCERTAINTY IN METRES 100. Lat. 53°59'55" Long. 124°49'58"

Mining Division **Omineca** District **Range 4 Coast**
 County Township or Parish
 Lot ~~XXXXXXXXXX~~ Range
 Sec Tp. R.

HISTORY OF EXPLORATION AND DEVELOPMENT

This property is located on the north slopes of Nithi Mountain, at an approximate elevation of 3,600 feet. The claim group was owned by Fort Reliance Minerals Limited during 1964. Their assessment work included geological mapping and hand-trenching at a molybdenite showing on Tan 4.

OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

Quartz with molybdenite occupies fractures in medium grained, well jointed, altered granite. The disseminated molybdenite mineralization occurs in two sets of intersecting fractures; one set striking north 60 degrees and dipping southwestward, and the set striking north 30 degrees and dipping northeastward. Molybdic ochre was prominent on fractures in the vicinity of molybdenite.
