DESCRIPTION OF DEPOSIT/DESCRIPTION DU GISEMENT

The property is underlain by interbedded tuffs and sediments, cut by calcareous dykes, dioritic intrusions, and quartz veins. Some of the quartz veins carry values in gold. Four shallow diamond drill holes put down on one of the veins indicated 0.36 ounce gold per ton across 3 feet for a length of approximately 100 feet.

HISTORY OF EXPLORATION AND DEVELOPMENT  
HISTORIQUE DE L'EXPLORATION ET DE LA MISE EN VALEUR

This property is located on the west side of Motase Lake. The F.C. group of 19 claims was apparently located by prospectors working for the Huestis Mining Corporation Ltd. in 1961. In 1962 the property was under option to Noranda Exploration Company, Limited. Work during the year included geological mapping, geophysical surveying, and the diamond drilling of 5 holes totalling 302 feet. The option was subsequently dropped.

By 1965 the property had been reduced to two recorded claims, which were being held for exploration. Huestis Mining Corporation Ltd. was liquidated in September 1965, with the assets being taken over by Bethex Explorations Ltd.

Bethex Explorations Ltd. was sold in April 1969 to Bethlehem Copper Corporation Ltd. for shares of the latter.

Annual Reports, Dept. of Mines, B.C.: 1962, p. 9.
