

NAME OF PROPERTY EGG, FOO (REDFERN LAKE)

OBJECT LOCATED - showings - from descriptive data.  
 UNCERTAINTY IN METRES 1,500. Lat. 57°22'30" Long. 123°49'  
 Mining Division Liard District Peace River  
 County Township or Parish  
 Lot Concession or Range  
 Sec Tp. R.

OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

Middle Devonian limestones of the Dunedin Formation underlie the property with overlying Besa River Formation shales outcropping to the north and east. Dolomite of the Stone Formation underlies the limestone and outcrops to the southwest of the property. Sphalerite, galena, fluorite and barite are present in Dunedin reefal carbonates.

HISTORY OF EXPLORATION AND DEVELOPMENT

The property is located on a plateau area about 3 miles northeast of Redfern Lake, some 135 miles northwest of Fort St. John.  
 Vestor Explorations Ltd. staked 107 claims in the Egg, Foo, Chilly, Vista, and Damn groups in 1972. A geochemical survey late in the summer indicated a lead-zinc anomaly extending for 7,200 feet and averaging more than 1,000 feet in width.  
 Rio Tinto Canadian Exploration Limited optioned the property in January 1973 and subsequently staked the Tyr 1-43 claims. Exploration work by Rio Tinto during 1973-1974 included a magnetometer survey over 19 line-miles, a gradient-array induced potential survey over 16 line-miles, a pole-dipole induced potential survey over 6 line-miles, a geochemical soil survey (315 samples), and 1,997 feet of diamond drilling in 9 holes on Egg 3, 7 and Foo 19, 22, 24.

Associated minerals or products of value - Lead, Barite, fluorspar.
