Mining division/Division minière: SKEENA

During the summer of 1989, Bond International Gold Inc. purchased claims in the area. Diamond drilling intersected up to 216 feet of 0.28 ounce per ton Au and 1.4 ounces Ag per ton. This was from one of 5 holes testing Marc zone which had been traced for 500 metres. The other zone is Brad which was discovered by sampling an outcrop. There was no visible gold but there was 2% to 5% of sulphides including pyrite, pyrrhotite and sphalerite. Bond staked or optioned 3,600 claims covering about 225,000 acres. In 1989, Lac Minerals Ltd. purchased 65% interest in Bond. In 1990, there were diamond drilled 55 holes outlining 933,000 tons of 0.37 ounce per ton Au. (Northern Miner, Feb. 18, 1991).
