The showings are located on the east side of Sulphurets Creek above its confluence with Mitchell Creek.

A group of 52 recorded claims were held by Newmont Mining Corporation of Canada Limited in 1964. Trenching and sampling were done during the year.

OWNER OR OPERATOR AND ADDRESS

DESCRIPTION OF DEPOSIT

The showings consist of concentrations of sphalerite, galena, and sparse tetrahedrite in highly pyritized and silicified mica schist.

Associated minerals or products of value - Lead.
