GEOLOGICAL SURVEY BRANCH

PROGRAM YEAR:	1999/2000
REPORT #:	PAP 99-38
NAME:	ROBERT BOURDON

BRITISH COLUMBIA
PROSPECTORS ASSISTANCE PROGRAM
PROSPECTING REPORT FORM (continued)

B. TECHNICAL REPORT

- One technical report to be completed for each project area.
- **Refer to Program Requirements/Regulations, section 15, 16 and 17.**
- If work was performed on claims a copy of the applicable assessment report may be submitted in lieu of the supporting data (*see* section 16) required with this TECHNICAL REPORT.

Name BOB BOURDON Reference Number 99/2000 P101

LOCATION/COMMODITIES

Project Area (as listed in Part A) DEMERS MINFILE No. if applicable N/A

Location of Project Area NTS 092P 9W Lat 51°30'45" Long 120°15'30"

Description of Location and Access Via logging roads up Nekelliston and Demers Creeks. ATV can save time accessing skid trails and "deactivated" logging roads.

Main Commodities Searched For Zn, Cu, Au, Pb, Ag.

Known Mineral Occurrences in Project Area Worldstock, Cu porphyry type showing is located about 1.5 km W. of centre of project area.

WORK PERFORMED

1. Conventional Prospecting (area) ± 1000 ha - (2km x 10km approx).
2. Geological Mapping (hectares/scale) outcrops noted but very rare
3. Geochemical (type and no. of samples) Stratface ICP 37 ROCK, 38 SOIL, 61 TILLS, 13 SILTS
4. Geophysical (type and line km) magnetometer recce lines ± 2-5 km total.
5. Physical Work (type and amount) 5 ± 6 small pits near samples E73332, E73335 A,B,C
6. Drilling (no., holes, size, depth in m, total m) N/A -
7. Other (specify) N/A

SIGNIFICANT RESULTS

Commodities VERY ENCOURAGING ZN-Cu THE ANOMALY. Claim Name FOX GROUP.

Location (show on map) Lat see claim map Long _____ Elevation _____

Best assay/sample type 913 ppm Zn in tills - Values from 500 to 900 occur along the 10+ km length of the anomaly.

Description of mineralization, host rocks, anomalies Outcrop on the property is almost NIL - a few O/C's in road cuts. No mineralization of economic grade has been seen. High Copper for a large boulder (sample E73316) at North end of Fraser Lake and minor galena in a highly oxidized zone (sample E78836) are encouraging. Although no showing, I believe this is an excellent VMS target based on geochem and coincident mag anomaly.

Supporting data must be submitted with this TECHNICAL REPORT Trenching is planned for 2000 season.

Information on this form is confidential for one year from the date of receipt subject to the provisions of the *Freedom of Information Act*.

Demers/Phaser Lake Project

The attached set of maps was produced by merging the data contained in B.C. Ministry of Mines Open File Report 1998-6 with data from tills/soils collected by B. Bourdon and L. Addie during the 1998 and 1999 seasons.

Values for 50th, 90th etc. percentile contained in the Open File report were used to generate the maps. There are a few slight differences which I think are due to rounding of data.

The maps clearly show that in the Demers Creek/Phaser Lake area, there is a very strong linear till/soil anomaly which trends at approximately 160 degrees and has a strike length in excess of 10 kilometers. Highly anomalous elements include Zinc, Cadmium, Copper, Antimony, Arsenic, Barium and Mercury which may indicate the presence of a large VMS type deposit.

A comparison of the attached maps with the maps contained in Open Files OF1998-6 and OF1997-9 shows that the Phaser Lake anomaly is much stronger and longer that those generated by known VMS deposits such as the Samatosum, Chu Chua and Homestake which are located to the Southsoutheast.

PROSPECTORS ASSISTANCE PROGRAM
PROSPECTING REPORT FORM (continued)

B. TECHNICAL REPORT

- One technical report to be completed for each project area.
- **Refer to Program Requirements/Regulations, section 15, 16 and 17.**
- If work was performed on claims a copy of the applicable assessment report may be submitted in lieu of the supporting data (*see* section 16) required with this TECHNICAL REPORT.

Name Bob BOURDON Reference Number 99/2000 P101

LOCATION/COMMODITIES

Project Area (as listed in Part A) BAYONNE MINFILE No. if applicable N/A.

Location of Project Area NTS 082F/2W, 2E, 7W, 7E Lat 49° 15' Long 116° 45'

Description of Location and Access Most of area is accessible by fair standard logging roads. Some boat and ATV access required.

Main Commodities Searched For Be, Ta, REE, Industrial minerals such as kyanite, wollastonite, gemstones.

Known Mineral Occurrences in Project Area N/A

WORK PERFORMED

1. Conventional Prospecting (area) ± 10,000 ha. recce style project.
2. Geological Mapping (hectares/scale) NIL
3. Geochemical (type and no. of samples) 30 ELEMENT ICP 18 ROCKS, 4 SILTS
4. Geophysical (type and line km) N/L
5. Physical Work (type and amount) NIL other than prospecting/sampling
6. Drilling (no. holes, size, depth in m, total m) N/A.
7. Other (specify) N/A.

SIGNIFICANT RESULTS

Commodities _____ Claim Name NIL

Location (show on map) Lat ____ Long ____ Elevation ____

Best assay/sample type N/A.

Description of mineralization, host rocks, anomalies

Bayonne batholith contains an abundance of narrow pegmatite dykes and lenses. Both rock and sediment sampling showed very little of interest. Expectation was that both pegmatites and silts would carry anomalous elements such as Be, Ta etc. All results were negative.

Supporting data must be submitted with this TECHNICAL REPORT

Information on this form is confidential for one year from the date of receipt subject to the provisions of the *Freedom of Information Act*.

GROUP 1E - 0.25 GM SAMPLE DIGESTED WITH HCLO4-HNO3-HCL-HF TO 10 ML. UPPER LIMITS - AG, AU, HG, W = 200 PPM; MO, CO, CD, SB, BI, TH & U = 4000 PPM; CU, PB, ZN, NI, MN, AS, V, LA, CR = 10,000 PPM. DIGESTION IS PARTIAL SOME MINERALS & MAY VOLATIZE SOME ELEMENTS. - SAMPLE TYPE: ROCK Samples beginning 'RE' are Reruns and 'RRE' are Reject Reruns.

DATE RECEIVED: SEP 8 1999 DATE REPORT MAILED: Sept 16/99 SIGNED BY. C. Leong D. TOYE, C.LEONG, J. WANG; CERTIFIED B.C. ASSAYERS

ICP - .500 GRAM SAMPLE IS DIGESTED WITH 3ML 2-2-2 HCL-HNO3-H2O AT 95 DEG. C FOR ONE HOUR AND IS DILUTED TO 10 ML WITH WATER.
THIS LEACH IS PARTIAL FOR MN FE SR CA P LA CR MG BA TI B W AND MASSIVE SULFIDE AND LIMITED FOR NA K AND AL.
ASSAY RECOMMENDED FOR ROCK AND CORE SAMPLES IF CU PB ZN AS > 1%, AG > 30 PPM & AU > 1000 PPB
- SAMPLE TYPE: ROCK AU* - IGNITED, AQUA-REGIA/MIBK EXTRACT, GF/AA FINISHED. (10 gm)
Samples beginning 'RE' are Reruns and 'RRE' are Reject Reruns.

Standard is STANDARD DS2.

1 GRAM SAMPLE IS DIGESTED WITH 6 ML 2-2-2 HCL-HNO3-H2O AT 95 DEG. C FOR ONE HOUR AND IS DILUTED TO 20 ML WITH WATER, ANALYSIS BY ICP/ES & MS.
THIS LEACH IS PARTIAL FOR MN FE SR CA P LA CR MG BA TI B W AND LIMITED FOR NA K GA AND AL.
- SAMPLE TYPE: ROCK Samples beginning 'RE' are Reruns and 'RRE' are Reject Reruns.

DATE RECEIVED: AUG 16 1999 DATE REPORT MAILED: Aug 27/99 SIGNED BY: C. Leong ..... D. TOYE, C.LEONG, J. WANG; CERTIFIED B.C. ASSAYERS

GROUP 1F15 - 15.00 GM SAMPLE, 90 ML 2-2-2 HCL-HNO3-H2O AT 95 DEG. C FOR ONE HOUR AND IS DILUTED TO 300 ML, ANALYSIS BY ICP/ES & MS.
UPPER LIMITS - AG, AU, HG, W, SE, TE, TL, GA, SN = 100 PPM; MO, CO, CD, SB, BI, TH, U, B = 2,000 PPM; CU, PB, ZN, NI, MN, AS, V, LA, CR = 10,000 PPM.
- SAMPLE TYPE: SOIL Samples beginning 'RE' are Reruns and 'RRE' are Reject Reruns.
