

**OPEN FILE 1992-9**  
**MINFILE DATA ON MAJOR INDUSTRIAL**  
**MINERAL DEPOSITS IN B.C.**

By P. Fischl and D. Jakobsen

British Columbia is well endowed with a wide variety of industrial minerals. The annual value of their production, together with structural materials, varies between 10 and 15 per cent of the combined value of minerals, coal, petroleum and natural gas (3.28 billion in 1990). It is generally acknowledged that industrial minerals are underutilized in British Columbia and there is much room for growth.

Open File 1992-9 consists of a 1:2 000 000 scale map of British Columbia with the locations of the major industrial mineral deposits, and a floppy diskette containing the MINFILE data on these deposits. The data includes 398 B.C. industrial mineral deposits from the MINFILE database that are prospects (112), developed prospects (57), producers (45) or past producers (184). An industrial mineral is defined as "any rock, mineral or other naturally occurring substance of economic value, exclusive of metallic ores, mineral fuels, and gemstones". This dataset contains some exceptions to this definition, such as gemstones, high-tech metals and some metallic ores which are notable for their industrial uses. The data, distributed as zipped ASCII files on a 1.2 Mb diskette, can be used with MINFILE/pc V.3.0 or imported into other software packages for manipulation (refer to the README.DOC file on the data diskette).

MINFILE is the Geological Survey Branch's computerized mineral inventory database. The database, contains information on 10,580 metallic mineral, industrial mineral and coal occurrences in B.C. The information comprises: location, commodities, mineralogy, structure, host rock, lithologies, reserves, production, a summary text field (capsule geology) and a comprehensive bibliography. This information can be searched, reported and/or altered through a software program developed in-house called MINFILE/pc. The MINFILE data is generally distributed in 1:250 000 mapsheet sets (floppy disks, paper printouts and maps) and can be purchased from Crown Publications in Victoria. To receive the program, free of charge, please contact the MINFILE project at #201 - 553 Superior Street, Victoria, B.C. V8V 1X4, ph.(604) 356-2825 or 356-2826.
