# Placer Gold Production of British Columbia

By Stuart S. Holland

In view of the recent increases in the price of gold, renewed interest in placer mining has led to a large number of requests for information. Consequently, Bulletin 28, *Placer Gold Production of British Columbia*, which was out of print, has now been reprinted for your convenience. The text of the bulletin is unchanged from the original. No attempt has been made to update it.

## PREFACE

This bulletin sets forth the recorded placer production for the Province and for each placer stream in British Columbia. The data are the most complete now possible; however, they are necessarily incomplete because production was not recorded officially until 1874 and because for many creeks records of production since 1874 are incomplete.

Some readers may have records of production of placer gold or of the fineness of placer gold not covered by the tables in this bulletin or that show the tables to be in error. The Department of Mines will welcome any such information and will be glad to incorporate into its records data based on Assay Office receipts or other authentic records. The Department will sincerely appreciate any contribution that will make the record of placer production more complete and more accurate.

The production data and the accompanying notes are presented because of their interest and value to those who contemplate placer-mining or prospecting for placer deposits in British Columbia and also to those who wish data on placer production as a guide in their search for lode-gold deposits. Incidentally, the tabulated data and the accompanying notes throw light upon an activity that played an extremely important part in the opening-up and the early history of many parts of British Columbia.

The data were tabulated by several assistants who worked for varying periods in several years. This work was directed and scrutinized painstakingly by Dr. Stuart S. Holland.

# Placer Gold Production in British Columbia

---

## CHAPTER I.—INTRODUCTION

The new wealth produced through the mining of placer gold in British Columbia was an extremely important factor in the early, rapid exploration of the Province. The incentive offered by the first discovery of coarse placer gold was great enough to draw a large number of prospectors to this country. The rich discoveries on the lower Fraser River bars drove them forward to explore vast, unknown stretches of territory in the hope of finding new placer fields.

The discovery of coarse placer gold at the mouth of Nicoamen River in 1857 initiated the gold-rush that led to the discovery of bar gold on the lower Fraser River at Yale, and upstream points in 1858. Discoveries made in the Cariboo area, on the Quesnel River and in the vicinity of Barkerville, came in such rapid succession and mining of the rich gravel deposits proceeded so rapidly that 1863 was the year of greatest placer gold production. The most important placer discoveries and their dates are listed below:—

- 1857—Coarse gold found at mouth of Nicoamen River.
- 1858—Gold-rush to bars on Fraser River.
- 1859—Gold discovered on Quesnel and Horsefly Rivers.
- 1860—Gold discovered on Rock Creek.
  - Quesnel Forks area opened up and gold discoveries made on Keithley and Antler Creeks.
- 1861—Rich strikes made on Williams Creek near Barkerville and on Lightning Creek near Van Winkle.
  - Bar gold found on the Parsnip River.
- 1863—Gold discovered on Wild Horse River.
- 1864—Gold found on Leech River.
- 1865—Gold discovered on French Creek led to other finds in the Big Bend area.
- 1869—Strike made on Vital Creek led to other discoveries in the Omineca.
- 1873—Gold discovered on Dease and Thibert Creeks in the Cassiar.
- 1885—Gold found on Granite Creek.
- 1898—Atlin placer field discovered.
- 1921—Rich strike made on Cedar Creek.
- 1927—Coarse gold found by Indians on Squaw Creek.
- 1932—Discovery of gold on Wheaton Creek.

Methods of placer-mining have changed very little over the years, except for the recent adoption of modern dirt-moving machinery. In the early days much of the gold was won by hand mining in shallow, accessible ground or by drift mining either from shafts in deep ground or from level workings in bench ground. These methods require high values. Mining of gravel much lower in grade than that which could have been worked profitably by other known methods began with the introduction of hydraulicking to the Cariboo about 1880. From time to time attempts have been made in various places to operate bucket-line or suction dredges, but the Kafue bucket-line dredge, which operated on Antler Creek from 1925 to 1928, is the only one that came close to being economically successful. The introduction of dragline dredging in 1941 permitted the mining of gravel that could not be worked successfully otherwise.

Production of gold from dragline dredges rose from \$52,147 in 1946 to its peak production of \$458,523 in 1948. Dragline dredging in the Province is reviewed in the Annual Report of the Minister of Mines, British Columbia, for 1949, pages 227 to 237.

## CHAPTER II.—ANNUAL PRODUCTION OF PLACER GOLD, 1858 TO 1949

Details of placer gold production for all parts of British Columbia are compiled for the first time in this publication. The previously published total gold production of British Columbia is shown in Table I (p. 9) and is shown graphically in Figure 1 (facing p. 10), which also relates high points of production with specific events. Figures for the first part of Table I were originally prepared in Victoria in the winter of 1875 by the Deputy Minister of Mines (Mr. Charles Good) and Dr. G. M. Dawson, and were published in the Annual Report of the Minister of Mines, British Columbia, for 1875. Since then the table has been republished annually with the necessary additions.

### SOURCE OF INFORMATION

For the early years the total is based on the amounts of gold shipped from Victoria by the banks, and by express and other companies, this being the best available means of approximating the yearly production. For 1874, the year of formation of the Department of Mines, and for the succeeding years additional information is available from yearly reports of production sent in by the Gold Commissioners, who were resident in each placer field and were familiar with placer activity.

It was impossible to determine the annual amount of gold taken away privately, for which there is absolutely no record, nor the amount of gold, shipped south from the Kootenay and Similkameen areas, which did not pass through Victoria. To allow for these amounts for the years up to and including 1877, an additional one-third was added to the amount actually known to have been exported. Dr. G. M. Dawson considered that this addition might be an under-estimate for the early years but probably was an over-estimate for the years immediately preceding 1877. From 1878 to 1899, except for 1896 and 1897, one-fifth of the amount has been added, and from 1900 to 1925 one-tenth.

Since 1900 the yearly production figure has been derived largely from returns of the Gold Commissioners. This information, since 1925, is further augmented by annual returns of production made by operating companies and by individuals. Additional information regarding gold that has been shipped is made available by banks and by the Mint. Current production figures are compiled by the Mining Statistician of the Bureau of Economics and Statistics.

### CONVERSION FACTORS AND FINENESS OF PLACER GOLD

The dollar value of the production in Table I has been converted into ounces of crude placer gold by using a conversion factor of \$17 per ounce when the price of fine gold was \$20.67. Since 1932 a proportionately greater figure is used, based on the higher price of fine gold that has prevailed. The basic factor of \$17 per ounce has been used for many years and was considered to approximate the average price of crude placer gold.

A total of 1,181 fineness determinations on placer gold from 173 different creeks is now available. The numerical average of these 1,181 separate recordings is 862\* and the numerical average of the average fineness of gold from 173 creeks is 861. This is equivalent to a basic conversion factor of \$17.85 per ounce of crude gold (see Table III).

\* Placer gold is a natural alloy of gold and silver containing minor amounts of other metals. The purity of the gold is measured by its fineness, which is the number of parts of gold in one thousand parts of alloy.

Table I.—Placer Gold Production, 1858 to 1949

Year	Ounces (Crude Gold)	Value	Year	Ounces (Crude Gold)	Value
1858 .....	41,470	\$ 705,000	1905 .....	57,020	969,300
1859 .....	95,000	1,615,072	1906 .....	55,790	948,400

1897 .....	30,210	513,520	1944 .....	11,433	361,977
1898 .....	37,840	643,346	1945 .....	12,589	398,591
1899 .....	79,110	1,344,900	1946 .....	15,729	475,361
1900 .....	75,220	1,278,724	1947 .....	6,969	200,585
1901 .....	57,060	970,100	1948 .....	20,332	585,200
1902 .....	63,130	1,073,140	1949 .....	17,886	529,524
1903 .....	62,380	1,060,420	Totals .....	5,102,521	93,093,524*
1904 .....	65,610	1,115,300			

\* The total corrects several errors—one of \$1,000,000 which affected the totals in the corresponding table published in the Minister of Mines, British Columbia, Annual Reports for years preceding 1949.

Certain streams, mainly in the Similkameen Mining Division, have produced placer platinum as well as placer gold. The total recorded value of platinum production from 1887 to 1945 is \$93,137.

### CHAPTER III.—DETAILS OF PLACER PRODUCTION

On succeeding pages are tabulated details of the placer gold production from all streams for which there is an official record. This compilation sets forth for the first time production information available from several official sources. Although it represents the best record that it is possible to assemble from the information at hand, it is known in some instances to be incomplete. The fact that no production is shown from a stream during a certain period may be because there was no actual production, or because no official record of the gold produced is available. A major fault of the compilation is that there is no detailed record of production before 1874. During the early period from 1857 to 1874 most of the major placer discoveries were made and at least a third of the total placer gold was mined.

An indication of the degree of accuracy of the production figures may be obtained from Table II. For the period from 1874 to 1945 the gold production, from Table I, totals \$54,946,559. Column two of Table II sets out the production of various mining divisions for the same period. These production figures have been published in the Annual Reports and their total is \$51,348,606. The difference between the two totals results from the fact that up to 1877 one-third was added to the amount actually known to have been produced, from 1878 to 1899 one-fifth was added, and from 1900 to 1925 one-tenth was added. This additional amount was considered sufficient to correct the total for the amount of gold taken from the country by individuals and for which there was no record by the express companies, banks, the assay office, or otherwise.

Column one of Table II lists by mining divisions the totals of the gold production for the period from 1874 to 1945 that has been assigned to various creeks and rivers in Tables V to XLI. Thus Tables V to XLI account for \$41,258,197 in gold of a known production of \$51,348,606. For any mining division, a comparison of the figures in column one with those in column two will give a measure of the over-all accuracy of the detailed production figures for that particular division. For example, the total gold production of the Fort Steele Mining Division is well accounted, that of the Lillooet and Stikine divisions reasonably well, while Atlin, Cariboo, and Quesnel divisions are several million dollars short, and for the Revelstoke Mining Division considerably less than half the recorded total is accounted.

The absence of detailed production records before 1874 mainly affects the totals of gold produced from streams in the Yale, Lillooet, Quesnel, Cariboo, and Fort Steele Mining Divisions.

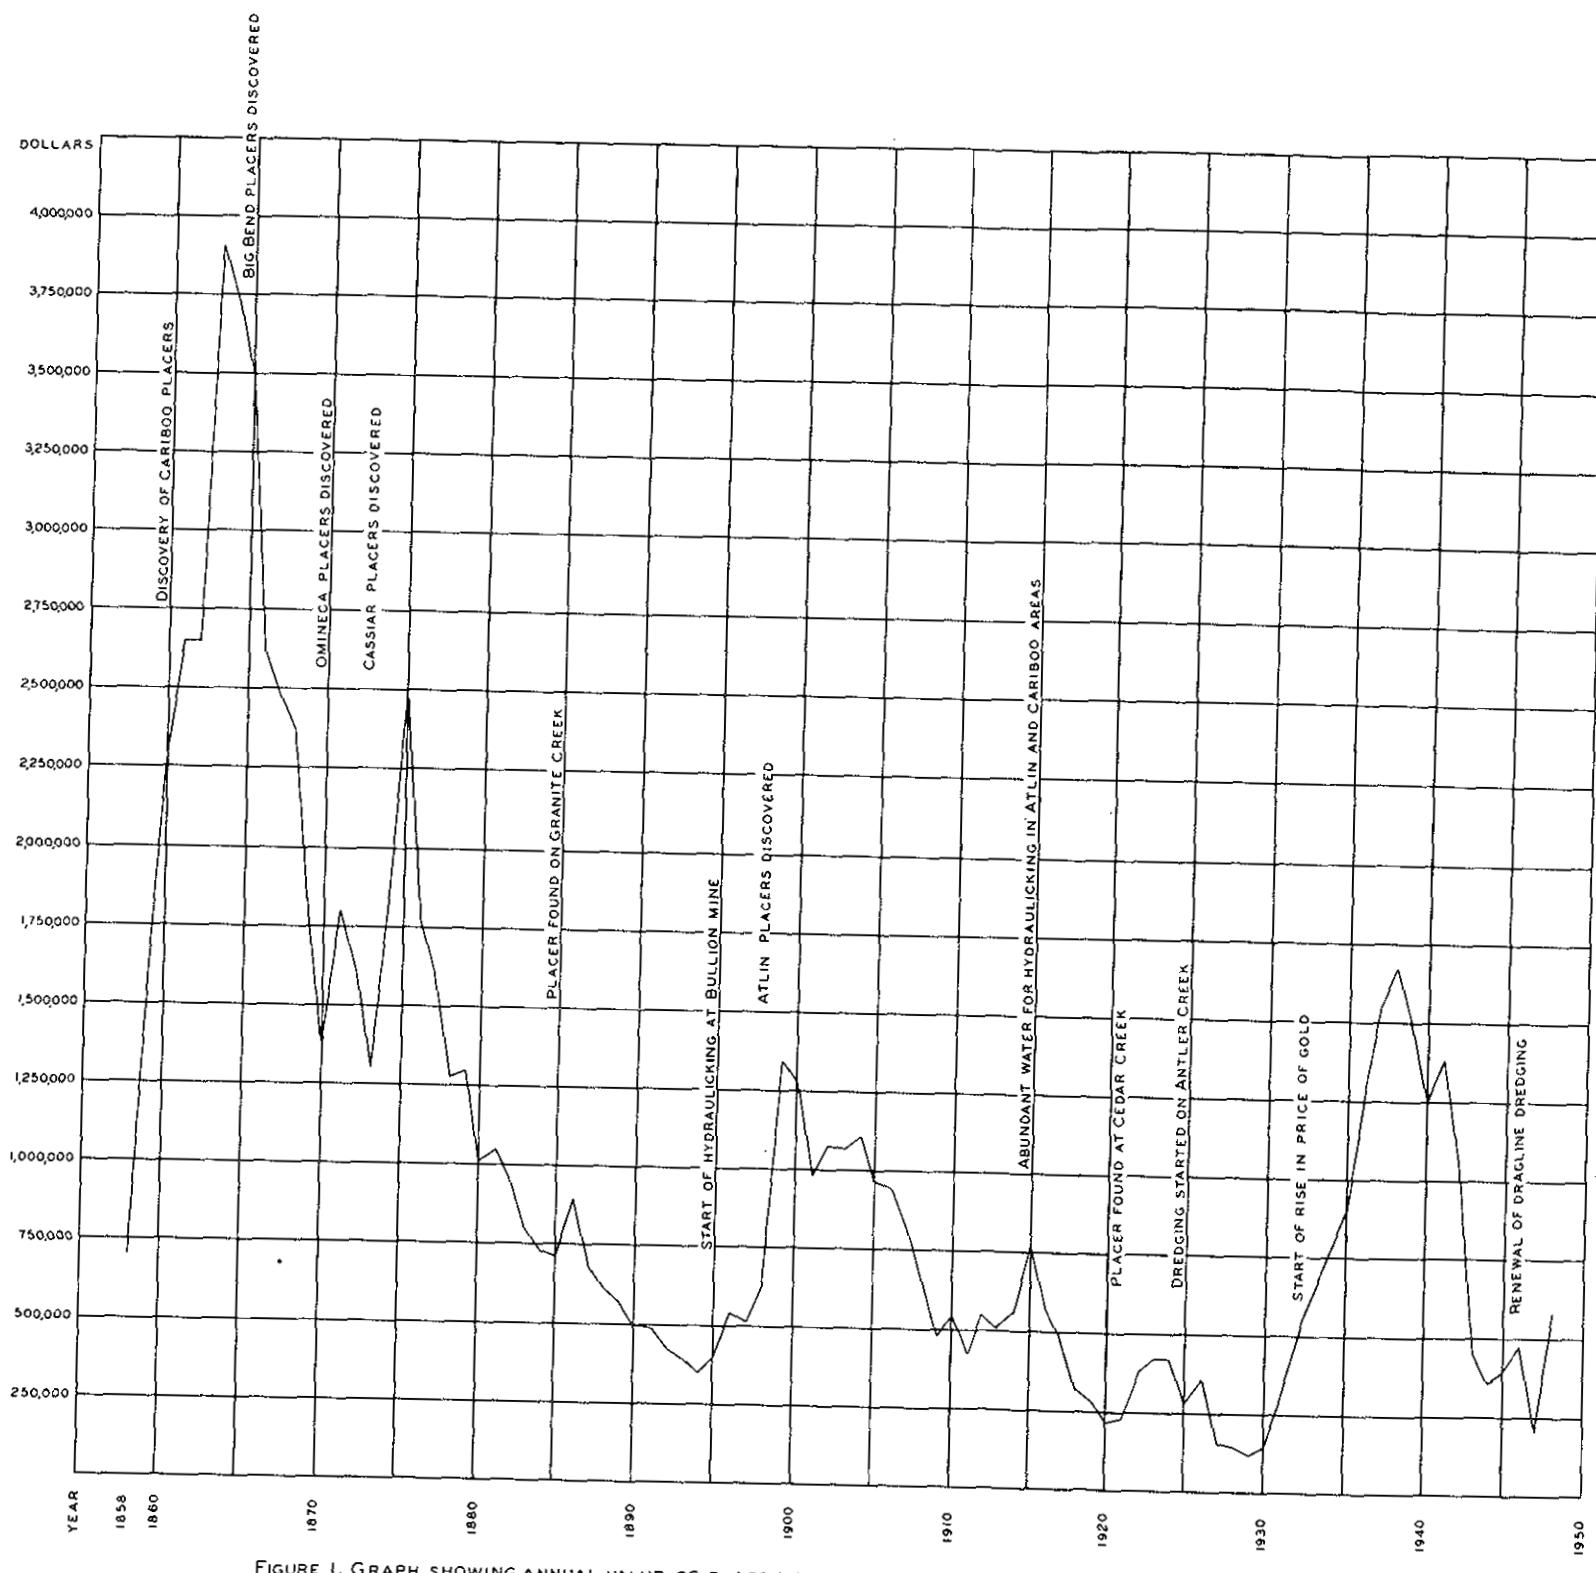

FIGURE I. GRAPH SHOWING ANNUAL VALUE OF PLACER GOLD PRODUCTION AND IMPORTANT PLACER EVENTS

*Table II.—Recorded Placer Gold Production by Mining Divisions,  
1874 to 1945*

Mining Division	Total of Gold Accounted for in Tables V to XLI	Approximate Total Gold Production by Districts as Published in Annual Reports, 1874 to 1945 <sup>1</sup>
Ainsworth, Nelson, Slocan.....	\$31,127	\$97,375
Alberni, Nanaimo, Victoria.....	32,984	71,730
Atlin.....	12,761,762	14,865,979
Cariboo.....	11,465,315	14,898,601
Clinton.....	219,668	
Fort Steele.....	1,058,884	1,213,073 <sup>2</sup>
Golden.....	20,877

Lillooet.....	1,843,365	2,175,509 <sup>3</sup>
New Westminster.....	585,751	1,210,471 <sup>4</sup>
Omineca.....	1,161,577	1,802,829
Peace River.....	73,350	93,755
Portland Canal, Skeena.....	28,877	90,873
Quesnel.....	5,435,915	7,125,997
Revelstoke.....	145,880	356,030
Similkameen.....	794,933	1,080,607 <sup>5</sup>
Stikine.....	5,063,369	5,475,287
Vernon.....	128,525	142,135
Totals.....	\$41,258,197	\$51,348,606

<sup>1</sup> An estimate is made for a division for any year for which no official record is now available.

<sup>2</sup> Includes production from Windermere and Golden Mining Divisions.

<sup>3</sup> Includes production from Clinton Mining Division.

<sup>4</sup> Includes production from Yale, Ashcroft, and Kamloops Mining Divisions.

<sup>5</sup> Includes production from Vernon Mining Division.

Despite their inaccuracies and limitations\* it is hoped that the publication of these records of production will serve a useful purpose in presenting the best record available, in showing the widespread distribution of placer gold, and in dispelling mistaken beliefs which may have arisen about the richness of certain placer streams.

#### SOURCE OF INFORMATION

The information incorporated in the tables has been derived from:—

- (a) Annual reports of Gold Commissioners, in which estimates are made of the dollar value of the placer gold production of all streams in each division. These reports are available since 1874, and from 1874 to 1895 were published annually in the Annual Report of the Minister of Mines. They have not been published since 1895.
- (b) Returns of production which, since 1925, have been made by operating companies and individuals, and which have been sent to the Mining Statistician.
- (c) Gold shipments reported by Canadian chartered banks and shipments of gold received by the Mint.
- (d) Statements of placer production in various reports on operations published in Annual Reports of the Minister of Mines.

#### CONVERSION FACTORS AND FINENESS OF PLACER GOLD

Up to 1925 the estimates made by the Gold Commissioners gave the dollar value of the production, but since 1925 production has been estimated by the Gold Commissioners in ounces of crude gold. Individual production returns made by the operators may record production either in ounces of crude gold or in dollar value of production.

\* If any reader has authentic records of production that have not been included in the Tables of Production, it would be greatly appreciated if they be sent to the Department of Mines, Victoria, B.C.

The tables combine information from all sources and show production expressed both in dollar value and in ounces of crude gold. This necessitates a conversion factor (dollar value per ounce of crude gold) being assigned to gold from every stream. The conversion factor used is derived from the actual or assumed fineness of gold from the particular stream and the average price of fine gold for the particular year. Table III shows the gross value per ounce of gold of different finenesses used for different years. For example, the conversion factor used for 1937 for a stream whose gold had a fineness of 857 would be \$30.15 (see line 11, column 6, Table III).

*Table III.—Conversion Table Showing Gross Value per Ounce  
of Crude Gold for Various Years*

Gold Fineness	Up to 1931	1932	1933	1934	1935-38	1939	1940-45
651-670	\$13.85	\$15.65	\$19.00	\$22.90	\$23.20	\$24.00	\$25.50
671-690	14.25	16.10	19.60	23.60	23.90	24.70	26.30
691-710	14.65	16.55	20.15	24.25	24.60	25.40	27.05
711-730	15.05	17.00	20.70	24.95	25.30	26.10	27.80
731-750	15.45	17.45	21.30	25.60	26.00	26.85	28.60
751-770	15.85	17.95	21.85	26.30	26.70	27.55	29.35
771-790	16.25	18.40	22.40	27.00	27.40	28.25	30.10
791-810	16.65	18.85	22.95	27.70	28.05	29.00	30.85
811-830	17.05	19.30	23.50	28.35	28.75	29.70	31.60
831-850	17.45	19.80	24.10	29.00	29.45	30.40	32.40
851-870	17.85	20.25	24.65	29.70	30.15	31.10	33.15
871-890	18.25	20.70	25.20	30.40	30.85	31.85	33.90
891-910	18.65	21.15	25.80	31.10	31.50	32.55	34.70
911-930	19.05	21.60	26.35	31.75	32.20	33.30	35.45
931-950	19.45	22.10	26.90	32.45	32.90	34.00	36.20
951-970	19.85	22.55	27.45	33.10	33.60	34.70	37.00
971-990	20.25	23.00	28.00	33.80	34.30	35.40	37.75
991-1000	20.67	23.47	28.60	34.50	35.00	36.14	38.50

NOTE.—The average price of fine gold is taken from Table II, page 14, of Annual Report of Minister of Mines, British Columbia, 1947. Up to 1931 an average price of 60 cents per ounce for silver is used, and for 1932 and later years an average price of 40 cents per ounce is used.

All available sources of information have been used to determine or to approximate the average fineness of placer gold from every stream. For many streams, fineness determinations have made it possible to strike a numerical average, but for others that lack specific data a fineness has been assumed. For all streams the quantity of gold for which the fineness is known is much less than the total production recorded. All fineness information has been compiled in tables which accompany the tables of production.

Gold of lowest fineness, 695½, was mined from Cherry Creek. Gold of high fineness, about 970, is reported from Goat River,\* and about 980 from Big Lake Creek.†

The numerical average of 1,181 separate fineness determinations is 862. The numerical average of the average fineness of gold from 173 streams is 861. It should be pointed out that the conversion factor used in the following production tables represents the gross value of crude gold of a particular fineness. It is approximately the gross value that would be allowed by the Mint for the gold before Mint and other charges have been deducted. In most instances it is higher than the price at which the gold was bought by banks, stores, and other gold-buyers, who deduct commission, expressage, insurance, and assay and Mint charges. The prices paid by Barkerville banks as quoted in Minister of Mines, British Columbia, Annual Report, 1902, pages 103 and 104, may be compared with corresponding factors in Table X. The conversion factor used may differ also from statements of gold value that have been published, and from values that previously have been used for calculations. The conversion factors used are thought to represent a closer approximation to the actual value than those used‡ formerly.

\* Two prospectors, independent of each other, have confirmed this value. There is, however, no actual fineness determination available to the writer.

† *Minister of Mines, B.C., Ann. Rept., 1932*, p. 118.

‡ If any reader has records of fineness based on Assay Office receipts or other determinations, which show these figures to be in error or which will supplement those already available, it would be greatly appreciated if they be sent to the Department of Mines, Victoria, B.C.

## ARRANGEMENT OF INFORMATION

In each of the following tables the streams are listed alphabetically. A table groups the streams of one or of several adjoining mining divisions, and the tables are arranged alphabetically rather than in geographical order.

This arrangement has resulted in the Fraser River, which flows through six mining divisions, being listed in six tables, each giving the production from that part of the river lying within the division.

The current mining divisions are used in the following tables, and certain of these represent amalgamations of former divisions. For example, Alberni Mining Division includes the former Clayoquot, Golden Mining Division includes the former Windermere, Greenwood Mining Division includes the former Grand Forks, Kamloops Mining Division includes the former Ashcroft, Nanaimo Mining Division includes the former Quatsino, New Westminster Mining Division includes the former Yale, Portland Canal Mining Division includes the former Nass River, Revelstoke Mining Division includes the former Lardeau and Trout Lake, Skeena Mining Division includes the former Bella Coola and Queen Charlotte, Slocan Mining Division includes the former Slocan City and Arrow Lake, and Stikine Mining Division includes the former Liard. The boundaries of mining divisions are shown on Figures 2, 3, and 4.

Each table lists only those streams from which some production of placer gold has been recorded. Records of production begin in 1874. From 1876 on, the amount of gold recorded from each stream, expressed as ounces of crude gold and as dollar value, is totalled for each five-year period. The last five-year period ends in 1945. In many instances gold may not have been produced in every year of a five-year period, but it is not practical to print the yearly details of production. If, however, these yearly production figures are desired, they may be obtained by applying to the Department of Mines, Victoria, B.C.

The geographical positions of all streams listed in the following tables are shown on the three accompanying maps (Figs. 2, 3, and 4, in pocket). Figure 2 shows the position of placer streams in the northern half of the Province, and Figure 3 the position of placer streams in the southern half. The streams in the Cariboo and Quesnel Mining Divisions are shown in detail on Figure 4.

Each stream has been assigned a number, which appears in the table and which corresponds with the stream's location on the accompanying figure. To facilitate the locating of a stream on the figure, the numbers have been assigned in sequence, starting in the extreme northwest corner of the Province. The numbering begins on the western side and progresses eastward in each strip between adjacent parallels of latitude. The succession of strips is from north to south. This numbering sequence is used for the whole Province and runs through Figures 2, 3, and 4. Under this arrangement, Squaw Creek, in the extreme northwest corner of the Province, is number 1 on Figure 2. The numbering on Figure 3 ends with the southernmost streams on Vancouver Island, Sooke River being number 226. On Figure 4 the numbers progress similarly, starting with 227 in the northwest corner and finishing with 340 in the southeast corner.

For the convenience of the reader the total production recorded from each creek is shown on the table recording the fineness and conversion factors.

## NOTES AND PRODUCTION TABLES

### AINSWORTH, NELSON, AND SLOCAN MINING DIVISIONS

The Ainsworth, Nelson, and Slocan Mining Divisions have been grouped for convenience.

Placer gold was found on the Pend d'Oreille River in very early times and on Forty-nine Creek in 1867. Despite the fact that there has been sporadic placer activity upon these and other streams in the district, there is very little production of placer gold

recorded before 1931. The total known production is small and the country never has been considered to be placer territory, yet the position of the gold occurrences may be significant.

Table IV lists recorded gold fineness and the conversion factors used in Table V, and Table V lists the production recorded for each stream.

Although there has been some placer activity on Caribou Creek, Falls Creek, and Rover Creek, no gold production has been recorded from them.

#### ALBERNI, NANAIMO, AND VICTORIA MINING DIVISIONS

The three mining divisions on Vancouver Island—i.e., Alberni, Nanaimo, and Victoria—have been grouped for convenience.

The records of production of placer gold from Vancouver Island are incomplete despite the fact that many creeks and rivers are known to carry small amounts of gold. The recorded production is set out in Table VII.

The main placer-mining on the Island was on Leech River, which was discovered in 1864, yet there is no record of production until 1924. China Creek is reported to have produced more than \$40,000 worth of gold, but there are no records of gold produced from that creek.

Table VI lists gold fineness determinations and the conversion factors used in Table VII. Table VII lists the production recorded for each stream.

Placer gold has been found on the following streams, but there is no record of production: Amos Creek, Bedwell River, China Creek, Cowichan River, Franklin and Gordon Rivers, Gold Creek, Granite Creek, Loss Creek, Nahwitti River, San Juan River, Sombrio River, Sooke River, Ucona (Gold) River, and Zeballos River.

<sup>1</sup> It is reported that prior to 1874, \$200,000 was mined from the Sooke and Leech Rivers.

### ATLIN MINING DIVISION

Since the discovery of gold in the area in 1897, records of production from streams in the Atlin Mining Division are available for all years except 1901. In 1898 and 1906 the Gold Commissioner estimated the dollar value of production, and in 1899 and 1900 the estimate of production was in ounces. From 1901 to 1905, and for 1907 and 1908, the Gold Commissioner recorded both ounces and dollar value of production and used the following conversion factors: Birch Creek, \$15 per ounce; Pine, Boulder, Otter, and Ruby Creeks, \$15.50 per ounce; and Spruce, McKee, and Wilson Creeks, \$16 per ounce. These differ considerably from the conversion factors listed in Table VIII for the same streams. For the years 1901 to 1905, 1907, and 1908 the ounce and dollar figures, previously published in the Annual Reports of the Minister of Mines, are used in Table IX.

From 1909 to 1924 the estimate of production was made by the Gold Commissioner in dollars. Since 1925 it has been made by the Provincial Mineralogist or Mining Statistician in ounces of crude gold.

Table VIII lists known fineness determinations and the conversion factors used in Table IX, and Table IX lists the production recorded for each stream. The district average fineness is used for the conversion factor for all streams other than those for which an average fineness can be determined. The average fineness of gold from the Atlin district, based on recorded fineness determinations, is 813.

Placer activity has been reported on Blizzard (Gold Run) Creek, Canyon Creek (a tributary of Inklin River), Carvell Creek, Fourth of July Creek, bars along the Inklin River, Johnson Creek, Klehini River, and on Moose Horn, Silver, and Trout Creeks, but no gold production is recorded from them.

<sup>4</sup> Discovered in 1927 (no returns for 1929 and 1930).

#### CARIBOO MINING DIVISION

The recorded gold production of the Cariboo Mining Division is considerably greater than that of any other division in the Province. The first discoveries of placer streams were made in 1860; new creeks were found quickly, and production mounted so rapidly that 1863 was the year of greatest placer output. Although detailed records of production are available from 1874 onward, it is believed that fully one-third of the total Cariboo production was mined in the preceding fifteen years. Since 1874 the detailed record of production appears to be reasonably complete. There are, however, gaps in the production records for streams known to have been worked continuously. Although recognized as incomplete, these records cannot be improved unless further information is made available.

Table X lists recorded gold fineness, available from returns made to the Mining Statistician and from the Record Book of the Government Assay Office, which was in Barkerville from 1869 to 1895, and the conversion factors used in Table XI. Table XI lists the production recorded from each stream. The average fineness of more than 200,000 ounces of gold and of 3,193 fineness determinations made by the Government Assay Office in Barkerville is 865.4. This is slightly less than the average of seventy-nine creeks in Table X probably because the gold bought at Barkerville included a higher percentage of the output from Williams Creek than from the other streams. Gold of

exceedingly high fineness, about 970 parts per thousand, is reported\* to have been found on Goat River.

Placer activity of one sort or another is reported from the following streams, but there is no record of any gold having been produced: Agnes Creek, Albrecht Creek, Aura Fina Creek, Basswood (Basford) Creek, Bead Creek, Beggs Gulch, Bounding (Boulder) Creek, Cafe (Coffee) Creek, Campbell Creek, Carruthers Creek, Comet Creek, Empire Creek, Eskridge Creek, Gerry Creek, Goldpin Creek, Hobo Gulch, Iroquois Creek, John Boyd Creek, Jubilee Creek, Kee Khan Creek, Kimball Creek, McLennan Creek, Murray Creek, Mustang Creek, Nineteen Mile Creek, Oregon Gulch, Pearce Gulch, Peter Gulch, Pundata Creek, Reddish Creek, Sawflat Creek, Six Mile Creek, Slade Creek, Umity (Deep) Creek, Watsons Gulch, West Road (Blackwater) River, Whipsaw Creek, and Wolfe Creek.

\* Although no Assay Office receipts were available as positive proof, two prospectors stated that Goat River placer gold ran about 970 fine, and was worth more than \$20 per ounce when the price of fine gold was \$20.67 per ounce.

Average for district—numerical average fineness of gold from seventy-nine streams, 875<sup>1/2</sup>.

<sup>1</sup> Location not known.

<sup>2</sup> Fineness assumed to be same as Lightning Creek at Stanley.

<sup>3</sup> Fineness assumed to be same as district average.

<sup>4</sup> Fineness assumed to be same as No Name Creek.

<sup>5</sup> Quoted in "Gold" by F. G. Claudet, Superintendent of Government Assay Office, Mainland Guardian, 1871.

<sup>7</sup> Fineness assumed to be same as Stouts Gulch.

<sup>8</sup> Fineness reported by Placer-miners J. J. Gunn and Roy Smith.

<sup>9</sup> Fineness calculated from value in *Minister of Mines, B.C., Ann. Rept.*, 1915, p. 57.

<sup>1</sup> Special estimate of production for 1907 made by John Hopp.

<sup>2</sup> Production for 1894 and 1895 from Cunningham Creek is combined with production from Antler Creek.

<sup>3</sup> Tributary of Lightning Creek downstream from Anderson Creek.

<sup>4</sup> Location not known.

<sup>5</sup> From 1888 to 1895 production from Burns Creek is combined with production from Nelson Creek.

<sup>6</sup> From 1878 to 1885 production recorded is from Chisholm Creek.

<sup>7</sup> From 1886 to 1888 production from Stouts Gulch is combined with production from Conklin Gulch.

<sup>8</sup> Production for 1884 and 1885 from lower Lightning Creek is combined with production from Cottonwood River.

<sup>9</sup> From 1906 to 1910 production from Stewart and Summit Creeks is combined with production from Eight Mile Creek.

<sup>10</sup> From 1883 to 1895 and from 1906 to 1908 production from Canadian Creek was recorded under Grouse Creek.

<sup>11</sup> Dollar value of Hardscrabble Creek gold is used.

<sup>12</sup> From 1879 to 1881, and 1883 production recorded from Hardscrabble Creek only.

<sup>13</sup> Production for 1881 and 1882 from Government Creek is combined with production from Hixon Creek.

<sup>14</sup> Production for 1874 from Davies, Jawbone, and Coulter Creeks is combined.

<sup>15</sup> From 1878 to 1882, 1884, and 1885 production recorded from Davis Creek only.

<sup>16</sup> Production from Cottonwood River included in figures for 1876 and 1877 and from 1891 to 1895.

<sup>17</sup> Tributary of George Creek.

<sup>18</sup> Production for 1875 from Antler, Jack of Clubs, McArthur, and Mosquito Creeks is combined with production from Lowhee Creek.

<sup>19</sup> From 1900 to 1906 production figures are from John Hopp's records.

<sup>20</sup> From 1912 to 1915 figures include production from John Hopp's operations on Lowhee Creek, at the Forest Rose on Williams Creek, at the Williams and Alabama placer claims on Mosquito Creek, and on Stouts Gulch.

<sup>21</sup> From 1918 to 1924 production from Mosquito Creek combined with production from Lowhee Creek.

<sup>22</sup> Production from Finlay River included in figures for 1935.

<sup>23</sup> From 1879 to 1882 production recorded from Mosquito Creek only.

<sup>24</sup> Production for 1894 from Little Valley Creek included with production from Mosquito Creek and Red Gulch.

<sup>25</sup> Production from Whipsaw Creek included in figures for 1895.

<sup>26</sup> From 1912 to 1915 figures for John Hopp's operations on Mosquito Creek are included with those for Lowhee Creek.

<sup>27</sup> Production from Campbell Creek included in figures from 1883 to 1885.

<sup>28</sup> Production from Campbell and Basswood (Bassford) Creeks included in figures from 1886 to 1889.

<sup>29</sup> Production for 1883, 1884, 1890, 1894, and 1895 from Canyon Creek included with production from Rouchon Creek.

<sup>30</sup> From 1886 to 1889 production from Deadwood (Deadtimber) Creek included with production from Rouchon Creek.

<sup>31</sup> From 1894 to 1896 production from Big Valley, Pinus (Pine), and Summit Creeks was recorded under Shepherd Creek.

<sup>32</sup> From 1880 to 1883 production recorded from Slough Creek only.

<sup>33</sup> Production for 1891 from Chisholm Creek is combined with production from Slough Creek and Devils Canyon.

<sup>34</sup> Dollar value of Stevens Creek gold is used.

<sup>35</sup> Production for 1891 from Beggs Gulch is combined with production from Stouts Gulch.

<sup>36</sup> From 1912 to 1915 figures for John Hopp's operations on Stouts Gulch are included with those for Lowhee Creek.

<sup>37</sup> From 1906 to 1911 production figures are from John Hopp's records.

<sup>38</sup> From 1883 to 1885, 1888, and 1889 production from Fountain Creek is combined with production from Swift River.

<sup>39</sup> From 1883 to 1885 production recorded from Van Winkle Creek only.

<sup>40</sup> From 1886 to 1888 and 1890 production from Chisholm Creek was recorded under Van Winkle and Perkins Creeks.

<sup>41</sup> Production for 1890 from Peters Creek is combined with production from Van Winkle and Perkins Creeks.

<sup>42</sup> Production from McCallum and Eureka Gulches included in figures for 1878.

<sup>43</sup> From 1912 to 1915 figures for John Hopp's operations on Williams Creek are included with those for Lowhee Creek.

### CLINTON MINING DIVISION

Most of the placer gold of the Clinton Mining Division has come from the Fraser River and Watson Bar Creek.

The records of early production are incomplete, and from 1883 to 1900 the production of Fraser River in the Clinton Mining Division is included with that of the Lillooet Mining Division.

Table XII lists recorded gold fineness and the conversion factors used in Table XIII. Table XIII lists the production recorded for each stream.

Although there has been some placer activity on the following streams, there is no production of placer gold recorded from them: Big Creek, Boss Creek, Chilcotin River, Fenton Creek, French Bar Creek, and Ward Bar Creek.

*Table XII.—Clinton Mining Division: Gold Fineness and Conversion Factors Used in Table XIII*

	No. on Map	Number of Fineness Determinations	Weight of Gold Represented	Range of Fineness: Gold	Average Fineness: Gold	Fineness Used for Conversion	Conversion Factor Used	Total Production Recorded

<sup>1</sup> Tributary of Churn Creek.

<sup>2</sup> From 1883 to 1900 Clinton production was recorded with the Lillooet Mining Division.

#### FORT STEELE MINING DIVISION

Most of the placer gold from the Fort Steele Mining Division has come from Wild Horse River, formerly known as Wild Horse Creek, discovered in 1863. The record of production since 1874 is reasonably complete, but for the preceding years, as for all old placer diggings, there is absolutely no record. From 1896 to 1905 the production of Perry Creek (discovered in 1867) is listed with that of Wild Horse River, and from 1906 to 1922 the production of the whole division is listed under Wild Horse River. In the early years Wild Horse River probably produced about nine-tenths of the total placer gold of the division.

Table XIV lists recorded gold fineness and the conversion factors used in Table XV. Table XV lists the production recorded for each stream.

There has been placer activity on the following streams, but no placer gold production is recorded from them: Nigger Creek, Palmer Bar Creek, St. Mary River, and Wood River.

Table XIV.—Fort Steele Mining Division: Gold Fineness and Conversion Factors Used in Table XV

<sup>1</sup> Includes production from Palmer Bar Creek.

<sup>2</sup> Includes production from Paris Creek.

<sup>3</sup> Production for 1874 from Perry and Weaver Creeks and Moyle River is combined with production from Wild Horse River.

<sup>4</sup> From 1896 to 1922 production is total for division, most of which is from Wild Horse River.

### GOLDEN MINING DIVISION

The Golden Mining Division incorporates the former Windermere Mining Division. There are several old placer creeks in the Golden Mining Division, but the gold production recorded from them is small. The main creeks are Quartz Creek, discovered in 1884, Canyon (Cannon) Creek in 1883, Toby Creek in 1864, and Findlay Creek in 1865.

Table XVI lists recorded gold fineness and the conversion factors used in Table XVII. Table XVII lists the production recorded for each stream. Placer gold from this area is notable for its high fineness.

*Table XVI.—Golden Mining Division: Gold Fineness and Conversion Factors Used in Table XVII*

	No. on Map	Number of Fineness Determinations	Weight of Gold Represented	Range of Fineness: Gold	Average Fineness: Gold	Fineness Used for Conversion	Conversion Factor Used	Total Production Recorded

<sup>2</sup> Tributary of Quartz Creek.

<sup>3</sup> Production for 1888 from Quartz Creek is combined with production from Porcupine Creek.

#### GREENWOOD MINING DIVISION

The Greenwood Mining Division incorporates the former Grand Forks Mining Division.

Placer gold was found on Rock Creek as early as 1859 or 1860, and a considerable amount was mined before the first recorded production in 1875. From then until 1895 the record of production is erratic. From 1896 to 1905, and from 1910 to 1930 no production is recorded even though the creek was worked more or less continuously. Production figures for other creeks in the division for the years to 1931 are equally incomplete.

Table XVIII lists recorded gold fineness and the conversion factors used in Table XIX. Table XIX lists the production recorded for each stream.

No gold production has been recorded from China Creek, Fourth of July Creek, Jolly Creek, Kettle River, and Norwegian Creek, yet placer activity has been noted on them.

Table XVIII.—Greenwood Mining Division: Gold Fineness and Conversion Factors Used in Table XIX

#### KAMLOOPS MINING DIVISION

The Kamloops Mining Division now includes the former Ashcroft Mining Division. In it are several well-known placer streams such as Tranquille Creek (discovered in 1858), Scotch Creek (worked before 1877), Louis Creek (mined as early as 1861), and Fraser and Thompson Rivers, as well as numerous others which have contributed only small amounts of placer gold.

Table XX lists known gold fineness and the conversion factors used in Table XXI. Table XXI lists the production recorded for each stream. For streams whose gold is of unknown fineness a conversion factor is used which is based on the average fineness of gold from sixteen creeks in the Kamloops, Similkameen, and Vernon Mining Divisions in the Southern Interior of the Province. This average fineness is 845.

Although there has been placer activity on the following streams, there is no production of placer gold recorded from them: Clearwater River, Crossing (Galena) Creek, Deadman River, Dow Creek, Dunn Creek, Heffley Creek, Hobson Creek, Jamieson Creek, Nehalliston Creek, Nicoamen River, Scottie Creek, Seymour River, Spius Creek, and Traceyville Creek.

Table XX.—Kamloops Mining Division: Gold Fineness and Conversion Factors Used in Table XXI

<sup>1</sup> From 1884 to 1887 production from Thompson River is combined with production from the part of the Fraser River that is in New Westminster Mining Division.

#### LILLOOET MINING DIVISION

Most of the production from the Lillooet Mining Division has come from bars and low benches along the Fraser River and along the Bridge River. Placers along both rivers were found in 1858, and although a large amount of gold was mined from them, no records of production before 1874 are available. In many years the production recorded for both rivers was combined.

Cayoosh Creek placers were discovered in 1886, but for the period from 1889 to 1906 there is no record of production even though the creek was worked each year.

Table XXII lists recorded gold fineness and the conversion factors used in Table XXIII. Table XXIII lists the production recorded for each stream.

Placer activity has been reported from Cadwallader Creek, Eldorado Creek, Ferguson Creek, Gun Creek, Hurley River, and Yalakom River, but there is no gold production recorded from them.

Table XXII.—Lillooet Mining Division: Gold Fineness and Conversion Factors Used in Table XXIII

<sup>1</sup> Discovered in 1886.

<sup>2</sup> Up to 1902 Bridge River production is included with Fraser River.

<sup>3</sup> Up to 1902 all production from Lillooet Mining Division and from 1883 to 1900 all production for Clinton Mining Division are recorded under Fraser River.

#### NEW WESTMINSTER MINING DIVISION

The New Westminster Mining Division now incorporates the former Yale Mining Division and extends up the Fraser River to a point about 12 miles south of Lytton.

Most of the placer gold mined in the New Westminster Mining Division has come from the Fraser River. Bar gold was discovered on the Fraser River near Yale in 1858.

The bars were mined very rapidly and contributed most of their gold before the start of recorded production in 1874. Since then bar miners have been continuously at work along the river, yet the record of productoin is not complete.

Table XXIV lists recorded gold fineness and the conversion factors used in Table XXV. Table XXV lists the production recorded for each stream.

There has been placer activity on the following streams, but no production is recorded from them: Hidden Creek, Lillooet River, Log Creek, Nine Mile Creek, Peers (Pierre) Creek, Skagit River, and Sowaqua Creek.

Table XXIV.—New Westminster Mining Division: Gold Fineness and Conversion Factors Used in Table XXV

<sup>1</sup> Tributary of Coquihalla River, 1 mile above Jessica Station.

<sup>a</sup> Production from Thompson River included in figures from 1884 to 1887.

NOTE.—Up to 1898 that part of Fraser River now in Kamloops Mining Division was recorded in former Yale Mining Division now incorporated in New Westminster Mining Division.

### OMINECA MINING DIVISION

Placer gold was first found on the bars of the Parsnip and Finlay Rivers in 1861, and subsequently on Vital Creek in 1869, on Germansen River in 1870, and on Manson River in 1871. Annual production to 1886 appears to have been recorded with reasonable completeness, but from 1887 to 1931 the records of production were kept haphazardly and are amongst the least complete in the Province.

Table XXVI lists recorded gold fineness determinations and the conversion factors used in Table XXVII. Table XXVII lists the production recorded for each stream.

There has been placer activity on the following streams, but no gold production is recorded from them: Babine River, Bob Creek, Chimdemash Creek, Dream Creek, Humphrey Creek, Kildare Gulch, Kleanza (Gold) Creek, Kwaniwa Creek, Ogden Creek, Omineca River, Osilinka River, Philip Creek, Porcupine Creek, Sibola Creek, Twin Creek, and Wheel Creek.

Average for district—numerical average fineness of gold, 861½.

<sup>1</sup> Fineness assumed to be same as district average.

<sup>2</sup> Calculated from dollar value given in return.

<sup>3</sup> Tributary of Skeena River, location unknown.

<sup>4</sup> Fineness assumed to be same as Lorne Creek.

<sup>5</sup> Reported by Bert Goodridge in letter.

<sup>6</sup> Calculated from dollar value quoted in B.C. Dept. of Mines, Bull. 1, p. 86 (1931).

<sup>7</sup> Calculated from dollar value quoted by George Snell.

### PEACE RIVER MINING DIVISION

Bar gold was found on the Peace River in 1861. Except for one year there is no production recorded before 1930 despite the fact that bar miners have been almost continuously at work along the river.

Table XXVIII lists recorded gold fineness and the conversion factors used in Table XXIX. Table XXIX lists the production recorded from each stream.

*Table XXVIII.—Peace River Mining Division: Gold Fineness and Conversion Factors Used in Table XXIX*

	No. on Map	Number of Fineness Determinations	Weight of Gold Represented	Range of Fineness: Gold	Average Fineness: Gold	Fineness Used for Conversion	Conversion Factor Used	Total Production Recorded

### PORTLAND CANAL AND SKEENA MINING DIVISIONS

The Skeena Mining Division includes the Queen Charlotte Islands where gold-bearing beach placers on the east coast of Graham Island have been known at least since 1877. The amount of placer gold mined elsewhere has been small, even though Douglas Creek was worked as early as 1886.

Table XXX lists recorded gold fineness and the conversion factors used in Table XXXI. Table XXXI lists the production recorded for each stream.

There has been some placer activity on Bear River, Bitter Creek, Hall Creek, Unuk River, and Willoughby Creek, but no gold production has been recorded from them.

Table XXX.—Portland Canal and Skeena Mining Divisions: Gold Fineness and Conversion Factors Used in Table XXXI

<sup>1</sup> Discovered in 1918.

<sup>2</sup> Tributary of Unuk River.

#### QUESNEL MINING DIVISION

The first placer-mining in the Quesnel Mining Division was along the Quesnel River, and on Horsefly River in 1859. In 1860 new discoveries were rapidly made—Keithley, Snowshoe, and Harvey Creeks were discovered—and a large amount of gold was produced before the earliest production was recorded in 1874. Fully one-third of the total production of the Quesnel Mining Division is believed to have been mined between 1860 and 1873. From 1875 to 1897 the records of production for all streams appear to be reasonably detailed and accurate. From 1898 to 1925 the details of recorded production, except for the Bullion mine, appear to have been kept erratically and no production is recorded from many streams which are known to have been worked. Since 1926, except for minor instances, the record of production is reasonably complete.

Table XXXII lists details of recorded gold fineness and the conversion factors used in Table XXXIII. Table XXXIII lists the production recorded for each stream. The gold from Big Lake Creek is thought to have the highest fineness,\* 980 parts per thousand, of any placer gold in the Province.

\* Minister of Mines, B.C., Ann. Rept., 1932, p. 118.

Placer activity has been noted on the following creeks, but no gold production is recorded from them: Baker Creek, Black Bear Creek, China Cabin Creek, Eureka Creek, Frasergold (Fraser) Creek, Moffat Creek, Mussel Creek, and Tinsdale Creek.

Average for district—numerical average fineness of gold from eighteen streams, 858.

\* Specimens.

<sup>1</sup> Fineness assumed to be same as average of district.

<sup>2</sup> Minister of Mines, B.C., Ann. Rept., 1932, p. 118.

<sup>3</sup> Fineness assumed to be same as Quesnel River.

<sup>4</sup> Fineness assumed to be same as Keithley Creek at Four Mile.

<sup>5</sup> Fineness assumed to be same as Lawless Creek.

<sup>6</sup> Fineness assumed to be same as Little Snowshoe Creek.

<sup>7</sup> Fineness assumed to be same as Cariboo River.

<sup>8</sup> Fineness assumed to be same as Keithley Creek at mouth of Weaver Creek.

<sup>2</sup> Production for 1876 from Harvey, Snowshoe, and Keithley Creeks is recorded under Quesnel River.

<sup>3</sup> Production for 1877 and 1878 is recorded under Keithley Creek.

<sup>4</sup> Includes all creeks in Keithley district in 1877 and 1878.

<sup>5</sup> Known to old-timers as Coquett Creek.

<sup>6</sup> Downstream from Quesnel Forks.

<sup>3</sup> Includes production from Harvey Creek in 1875 and probably most of early production of Little Snowshoe Creek.

<sup>11</sup> Production from Snowshoe Creek for 1906 and 1907 is recorded under production from Keithley Creek.

<sup>2</sup> Production for 1876 from Harvey, Snowshoe, and Keithley Creeks is recorded under Quesnel River.

<sup>3</sup> Production for 1877 and 1878 is recorded under Keithley Creek.

<sup>7</sup> South Fork of Quesnel River—upstream from Quesnel Forks.

<sup>8</sup> Production recorded from Snowshoe Creek probably was mined on what is now called Little Snowshoe Creek.

<sup>9</sup> Includes production from Harvey Creek in 1875 and probably most of early production of Little Snowshoe Creek.

<sup>10</sup> In 1876 production from Spanish Creek recorded under Quesnel River and in 1877 and 1878 under Keithley Creek.

<sup>11</sup> Production from Snowshoe Creek for 1906 and 1907 is recorded under production from Keithley Creek.

#### REVELSTOKE MINING DIVISION

The Revelstoke Mining Division includes the former Lardeau and Trout Lake Mining Divisions.

Placer gold was found on Goldstream, French, and McCulloch Creeks as early as 1865, and although a large amount of gold is known to have been produced from them, there is no record of production until 1886. For the period 1897 to 1929, except for 1912, there are no details of gold production, except for the Gold Commissioner's estimate of the total production of the division. In the Lardeau area, except for two years of production recorded for 1895 and 1896 from the Lardeau River, there is no gold production recorded before 1930. The production records of this division are poor.

Table XXXIV lists recorded gold fineness and the conversion factors used in Table XXXV. Table XXXV lists the production recorded for each stream.

It is thought that much of the gold mined from the Duncan River has been from near the mouth of Hall Creek. Placer activity has been noted on Cariboo Creek, Cascade Creek, Frenchman Creek (a tributary of Canoe River), and Poplar Creek, but no gold production is recorded from them.

Table XXXIV.—Revelstoke Mining Division: Gold Fineness and Conversion Factors Used in Table XXXV

#### SIMILKAMEEN MINING DIVISION

Although placer gold was found on the Similkameen River and some of its tributaries as early as 1860, there is no gold production recorded before 1885, the year of discovery of placer on Granite Creek, Slate Creek, and other creeks along Tulameen River. The record for the period since then is reasonably complete.

Table XXXVI lists known gold fineness and the conversion factors used in Table XXXVII. Table XXXVII lists the production recorded for each stream.

Placer activity has been noted on the following creeks, but there is no production of gold recorded from them: Britton (Eagle) Creek, Shrimpton Creek,\* and Siwash Creek.

\* *Geol. Surv., Canada, Mem. 243, p. 64.*

Average for district—numerical average fineness of gold from three creeks, 876.

<sup>1</sup> Fineness assumed to be same as district average.

<sup>2</sup> Fineness assumed to be same as Granite Creek.

<sup>1</sup> Discovered in 1885.

#### STIKINE MINING DIVISION

The Stikine Mining Division includes the former Liard Mining Division.

Bar gold was found along the Stikine River at Buck Bar and other places in 1861,\* but the important Cassiar placer creeks were not discovered until 1873 when Dease and Thibert Creeks were found and 1874 when McDame Creek was found. Other discoveries soon were made so that the production of placer gold mounted rapidly. Statistics of production are available since 1874, and consequently it is believed that the production record for the Cassiar is reasonably complete except for the period 1898 to 1907, for which no Gold Commissioners' reports are available.

Table XXXVIII lists recorded gold fineness and the conversion factors used in Table XXXIX. Table XXXIX lists the production recorded for each stream.

There has been placer activity on the following streams: Beady Creek, Hall Creek, Hotel Creek, Kechika River, Messoetoe Creek, Pauls Gulch, Settea Creek, Steamboat Creek, Three Mile Creek, and Turnagain (Little Muddy, Black) River, but no gold production has been recorded from them.

---

Average for district—numerical average fineness of gold, 849.

<sup>1</sup> Fineness assumed to be same as district average.

<sup>2</sup> Fineness calculated from dollar value on return by owner.

<sup>3</sup> Location unknown.

<sup>4</sup> Calculated from dollar value quoted in *Geol. Surv., Canada, Ann. Rept., 1887-88, Vol. III, Pt. II*, p. 139<sub>R</sub>.

<sup>5</sup> Fineness assumed to be same as Thibert Creek.

<sup>6</sup> Fineness assumed to be same as Tahltan River.

<sup>7</sup> Calculated from dollar value quoted in *Geol. Surv., Canada, Ann. Rept., 1887-88, Vol. III, Pt. II*, p. 138<sub>R</sub>.

<sup>8</sup> Fineness assumed to be same as McDame Creek.

<sup>9</sup> Fineness assumed to be same as Mosquito Creek.

<sup>10</sup> Calculated from dollar value quoted in *Minister of Mines, B.C., Ann. Rept., 1882*, table.

<sup>1</sup> Tributary of Wheaton Creek.

<sup>2</sup> Tributary of Thibert Creek.

<sup>3</sup> Location not known.

<sup>4</sup> Tributary of Turnagain River.

<sup>5</sup> Division total in 1874, \$1,000,000, was recorded under Dease Creek. Dease Creek production in 1875 was \$350,000.

<sup>6</sup> Tributary of Dease River below McDame Creek.

<sup>7</sup> Tributary of McDame Creek.

<sup>8</sup> Tributary of Tahltan River.

<sup>9</sup> Tributary of Palmer Creek.

<sup>10</sup> Production for 1875 only, for 1874 see footnote 5.

<sup>11</sup> Flows into Porcupine Lake.

<sup>12</sup> Tributary of Spring Creek.

<sup>13</sup> Tributary of McDame Creek—first north fork.

<sup>14</sup> Production for 1875 from Quartz Creek is combined with production from Troutline (Trout) Creek.

### VERNON MINING DIVISION

Two well-known placer creeks, Cherry Creek (worked since 1874) and Mission Creek (mined since 1875 or 1876), are in the Vernon Mining Division. Records of production are available from 1876 except for the period from 1896 to 1910.

Table XL lists known gold fineness and the conversion factors used in Table XLI. Table XLI lists the production recorded for each stream. It is worth noting that placer gold of lowest fineness, 695½ to 700, is recorded from Cherry and Monashee Creeks.

Placer activity has been noted on the following streams, but no production of placer gold is recorded from them: Bessette Creek, Duteau (Jones) Creek, Inonoaklin (Fire Valley) Creek, Moffat Creek, Peachland (Deep) Creek, Shuswap River, Troup Creek, and Yeoward (Porcupine) Creek.

*Table XL.—Vernon Mining Division: Gold Fineness and Conversion Factors Used in Table XLI*

## CHAPTER IV.—INDEX TO PLACER STREAMS IN PUBLICATIONS OF THE DEPARTMENT OF MINES, BRITISH COLUMBIA, 1874 TO 1949

The following index lists references in publications of the Department of Mines to placer streams mentioned in this bulletin. The index does not list references to claim names, owner's names, or company names. References to them may be obtained from the general indexes to publications of the Department.

The index has been prepared mainly from the indexes to Annual Reports of the Minister of Mines, British Columbia, from 1874 to 1949. These references are given first after each name indexed. References in several bulletins on placer-mining published from 1930 to 1943 and in the new series of bulletins beginning with Bulletin No. 1, 1940, are given after those in the Annual Reports. The titles of the bulletins from which references are indexed are given in the following list with the abbreviations used in the text in parentheses:—

- Bulletin No. 2, 1930—Placer-mining in British Columbia with Special Reports on Atlin, Queen Charlotte, Cariboo, Quesnel, and Omineca Mining Divisions. (Bull. 2, 1930.)
- Bulletin No. 1, 1931—Placer-mining in British Columbia. (Bull. 1, 1931.)
- Bulletin No. 2, 1932—Report on McConnell Creek Placer Area, Omineca Mining Division. (Bull. 2, 1932.)
- Bulletin No. 1, 1933—Placer-mining in British Columbia. (Bull. 1, 1933.)
- Notes on Placer-mining in British Columbia for the Information of the Individual Miner, 1936. Revised in 1938 and 1943. (Placer Bull., 1943.)
- Bulletin No. 1, 1940—Aiken Lake Area, North Central British Columbia. (Bull. 1, 1940.)
- Bulletin No. 2, 1940—Placer-gold Deposits, Wheaton (Boulder) Creek, Cassiar District, Northern British Columbia. (Bull. 2, 1940.)
- Bulletin No. 3, 1940—Fraser River Tertiary Drainage-history in Relation to Placer-gold Deposits. (Bull. 3, 1940.)
- Bulletin No. 8, 1940—Preliminary Report on Bedwell River Area, Vancouver Island, British Columbia. (Bull. 8, 1940.)
- Bulletin No. 11, 1941—Fraser River Tertiary Drainage-history in Relation to Placer-gold Deposits (Part II). (Bull. 11, 1941.)
- Bulletin No. 12, 1941—Reconnaissance in the Area of Turnagain and Upper Kechika Rivers, Northern British Columbia. (Bull. 12, 1941.)
- Bulletin No. 15, 1942—Hydraulic Mining Methods. (Bull. 15, 1942.)
- Bulletin No. 16, 1942—Dragline Dredging Methods. (Bull. 16, 1942.)
- Bulletin No. 19, 1944—The Tuya-Teslin Area, Northern British Columbia. (Bull. 19, 1944.)
- Bulletin No. 25, 1948—The Squaw Creek-Rainy Hollow Area, Northern British Columbia. (Bull. 25, 1948.)
- Bulletin No. 26, 1948—Report on the Stanley Area, Cariboo Mining Division. (Bull. 26, 1948.)
- Ah Bau Creek (Cariboo)—1916, 39; 1920, 97; 1929, 200; 1932, 95; Bull. 2, 1930, 39; Bull. 11, 1941, 30.
- Ah Quay Creek (Cariboo)—1899, 622; 1900, 731; 1901, 959; 1902, 102, 124; 1904, 44; 1905, 53; 1927, 168; 1928, 194; 1930, 164; 1931, 89.
- Albrecht Creek (Cariboo)—1904, 46.
- Alder Creek, *see* Norn Creek (Cariboo).
- Alexander Creek, *see* Marshall Creek (Lillooet).
- Alice Creek (Stikine)—1937, 83; 1939, 104; Bull. 2, 1940, 10.
- Amador Creek (Cariboo)—1910, 43; 1919, 106; 1927, 168; 1933, 132; 1941, 87; 1943, 83; 1944, 78; 1947, 192; 1948, 177; Bull. 26, 1948, 59.
- Amos Creek (Alberni)—1913, 283.
- Anderson Creek (Cariboo)—1875, 10; 1877, 1880, 1881, in tables; 1903, 58; 1905, 52; 1906, 39; 1910, 44; 1927, 168; 1930, 165; 1941, 88; 1942, 87; 1946, 198; 1947, 193; 1949, 242.

- Angus Creek (Cariboo)—1945, 126.  
 Antler Creek (Cariboo)—1874 to 1895, in tables; 1874, 5; 1875, 12; 1878, 373; 1879, 237; 1881, 392; 1882, 356; 1883, 401; 1884, 418; 1885, 381, 488; 1886, 196, 216, 238; 1887, 256; 1888, 291; 1889, 274; 1890, 360; 1891, 560; 1892, 526; 1893, 1038; 1896, 508; 1897, 465; 1898, 978; 1899, 621, 624; 1900, 733, 734, 736; 1901, 952, 960, 969; 1902, 93, 103, 117; 1903, 59; 1904, 46; 1905, 56; 1906, 43; 1907, 40; 1908, 43; 1909, 45; 1915, 54, 55; 1916, 38; 1918, 145; 1919, 107; 1921, 112; 1923, 122; 1924, 114; 1925, 146; 1926, 165, 166; 1927, 165; 1928, 193; 1929, 198; 1932, 102; 1933, 133, 134; 1935, C 36; 1938, C 52; 1939, 106, 109; 1940, 91; 1941, 86; 1942, 85; 1943, 82, 83; 1944, 77, 78; 1945, 126; 1946, 197; 1947, 192; 1948, 176.  
 Antoine Creek (Quesnel)—1929, 202; 1930, 167, 176; 1931, 100; 1932, 116; 1933, 145; Bull. 2, 1930, 42.  
 Aura Fina Creek (Cariboo)—1944, 77; 1945, 125; 1946, 197; 1947, 192; 1948, 175; 1949, 241.  
 Baker Creek (Quesnel)—1897, 489; 1898, 979; 1899, 629; 1934, C 33; 1938, C 36; Bull. 3, 1940, 9, 29.  
 Ball Creek (Stikine)—1929, 114.  
 Barnes Creek (Slocan)—1931, 147; 1935, E 36; Bull. 1, 1931, 100.  
 Barr Creek (Quesnel)—1912, 53; 1944, 79; 1945, 127; 1947, 196.

 Bones Gulch (Omineca)—1886 to 1887, in tables.  
 Boss Creek (Clinton)—Bull. 1, 1933, 41.

Boulder Creek (Atlin)—1899, 611, 646, 649, 653; 1900, 757, 774, 779; 1901, 983; 1903, 41, 44; 1904, 69, 70, 88, 94; 1905, 72, 75; 1906, 52, 57; 1907, 50, 53; 1908, 48, 52; 1909, 51; 1910, 53; 1911, 57; 1912, 58; 1913, 69; 1914, 77, 86; 1915, 61; 1916, 44, 45; 1917, 75, 78; 1918, 96, 98; 1919, 87, 89; 1920, 72; 1921, 75, 81, 83; 1922, 89; 1924, 81; 1926, 109; 1927, 115; 1928, 122; 1929, 121, 427; 1930, 124; 1932, 70; 1933, 89; 1935, B 28, G 47; 1936, B 59; 1937, B 44; 1938, B 29; 1939, 104; 1940, 88; 1941, 83; 1942, 83; 1945, 124; 1946, 195; 1947, 188; 1948, 172; 1949, 238; Bull. 2, 1930, 19; Bull. 1, 1931, 35.

Boulder Creek, *see* Bounding Creek (tributary to Goat River) (Cariboo).

Boulder Creek (Fort Steele)—1895, 674; 1900, 798; 1924, 187; 1933, 205; 1934, E 32; 1935, E 36.

Boulder Creek (Omineca)—1897, 516; 1900, 750; 1935, C 39; 1941, 84.

Boulder Creek, *see* Lockie Creek (Similkameen).

Boulder Creek (tributary to Thibert Creek) (Stikine)—1876, 413, 415; 1901, 987; 1911, 62; 1912, 63, 77; 1914, 99; 1917, 75; 1918, 83.

Boulder Creek, *see* Wheaton Creek (Stikine).

Boundary Creek (Greenwood)—1892 to 1894, in tables; 1894, map; 1896, 579; 1897, 462; 1898, 1120, 1126; 1931, 128; 1932, 131; 1933, 163; 1934, D 12; 1935, D 15; 1937, D 35; 1938, D 41; 1939, 111.

Bounding (Boulder) Creek, tributary to Goat River (Cariboo)—1922, 123.

Branham Flat (Peace River)—1923, 142.

Bridge River (Lillooet)—1876 to 1894, in tables; 1874, 3; 1876, 422; 1879, 240; 1880, 428; 1881, 395; 1882, 360; 1883, 411; 1884, 421; 1885, 491; 1886, 206, 210; 1887, 272; 1890, 376; 1891, 572; 1893, 1067; 1894, 749, 750; 1896, 550; 1897, 553; 1899, 609, 724, 727; 1900, 907, 911; 1903, 189; 1904, 241; 1905, 208, 209; 1907, 145; 1909, 144; 1910, 135, 149; 1914, 369; 1915, 283; 1916, 270; 1921, 193; 1922, 134; 1923, 165; 1924, 141; 1931, 113; 1938, F 70; 1944, 79; 1948, 179; 1949, 243; Bull. 1, 1933, 48.

Britton (Eagle) Creek (Similkameen)—1885, 494; 1887, 277, 280; 1907, 144; 1908, 132; 1922, 166, 167; 1946, 202; 1947, 198.

Browns Gulch (Stikine)—1879, table.

Bull Creek (Atlin)—1903, 44; 1904, 90; 1905, 73; 1913, 71; 1914, 79; 1915, 62; 1916, 45; 1917, 79; 1918, 100; 1921, 84; 1928, 122; 1932, 66; 1935, B 28; 1937, B 39.

Bull River (Fort Steele)—1882, 362; 1883 to 1894, in tables; 1883, 413; 1884, 423; 1885, 498; 1887, 270; 1888, 306; 1895, 671, 672; 1896, 517; 1898, 1004; 1899, 658; 1900, 797, 798; 1901, 1004, 1005; 1903, 93, 94; 1905, 141; 1906, 133; 1907, 85; 1934, E 33.

Bullion Creek (Stikine)—1933, 71.

Burdette Creek, *see* Jasper Creek (Atlin).

Burns Creek (Cariboo)—1874 to 1895, in tables; 1874, 5; 1876, 418; 1877, 394; 1897, 493; 1898, 978; 1899, 627; 1900, 733; 1901, 951, 957; 1902, 97, 101, 123; 1903, 62; 1926, 169; 1949, 241.

Butcher Bench (Cariboo)—1874, 6; 1875, 10; 1893, 1087; 1896, 509; 1925, 147; 1942, 87; 1943, 83; 1944, 78; 1945, 126.

Cadwallader Creek (Lillooet)—1886, 207; 1891, 572; 1892, 539; 1896, 551; 1898, 1099; 1899, 726; 1900, 911; 1909, 144; 1910, 139, 149; 1913, 253, 261; 1918, 229; Bull. 1, 1933, 49.

Cafe (Coffee) Creek (Cariboo)—1899, 609; 1900, 737; 1902, 119; 1904, 48; 1926, 168.

California Gulch (Cariboo)—1878, 1883 to 1885, 1890, in tables; 1904, 47; 1928, 193; 1929, 198; 1933, 133; 1946, 94; 1947, 114.

Camp Creek (Revelstoke)—1895, 690; 1896, 535; 1898, 1057; 1902, 138; 1903, 108; 1904, 115; 1909, 103; 1915, 116; 1922, 214; 1929, 330; 1931, 147; 1933, 212; 1934, E 34; 1935, E 36; 1938, E 45.

Campbell Creek (Cariboo)—1883 to 1888, in tables; 1942, 87.

Canadian Creek (Cariboo)—1879 to 1895, in tables; 1886, 232; 1892, 526; 1899, 624, 628; 1900, 733, 734; 1901, 952, 961; 1902, 95, 118, 119; 1904, 48; 1905, 55; 1907, 40; 1908, 43; 1940, 91; 1942, 85; 1949, 242.

Cannon Creek, *see* Canyon Creek (Golden).

Canyon Creek (Atlin)—1914, 84, 86; 1915, 63.

Canyon Creek (Cariboo)—1876, 418, table; 1877, 397, table; 1882, table; 1883, 407, table; 1890 to 1895, in tables; 1902, 103; 1929, 198; 1930, 159; 1931, 83; 1938, C 52; 1949, 240.

Canyon (Cannon) Creek (Golden)—1883, 413; 1885, 498, table; 1887, 270; 1894, 747; 1895, 671; 1900, 803; 1933, 201; 1935, E 36.

Cariboo (North Fork of Quesnel) River (Quesnel)—1875, 1876, 1879 to 1895, in tables; 1892, 529; 1893, 1039; 1894, 732; 1895, 659; 1896, 516; 1902, 60, 87, 88; 1904, 51; 1905, 59; 1910, 46; 1912, 53; 1913, 60, 66; 1924, 124; 1925, 157; 1926, 175; 1927, 175; 1928, 200; 1929, 204; 1930, 167, 173; 1932, 107; 1933, 136, 143; 1937, C 35; 1938, C 50; 1939, 109; 1941, 90; 1942, 89; 1943, 84; 1944, 79; 1945, 127; 1947, 195; 1948, 87; 1949, 230.

Caribou Creek (east side of Arrow Lake) (Slocan)—1894, 739.

Carnes Creek (Revelstoke)—1886, 202, 203, table; 1887, 264, 269, table; 1888, 303, 304; 1889, table; 1894, 743; 1895, 691, table; 1898, 1059; 1908, 90; 1922, 212, 215; 1927, 290; 1933, 211; 1936, E 53.

- Carvell Creek (Atlin)—1937, B 39; Placer Bull. 1943, 12.
- Cascade Creek (Ainsworth)—1912, 147; Bull. 1, 1933, 46.
- Cayoosh Creek (Lillooet)—1886 to 1895, in tables; 1886, 206, 210; 1887, 273; 1888, 323; 1889, 289; 1890, 376; 1891, 572; 1892, 539; 1893, 1067; 1894, 749, 750; 1895, 667, 669; 1896, 546, 548; 1897, 464, 553, 556; 1902, 199; 1904, 241; 1905, 208; 1906, 181; 1907, 145; 1909, 144; 1910, 134, 148; 1911, 188; 1916, 270; 1917, 232; 1920, 167; 1926, 191; 1927, 220; 1932, 211; 1933, 262; 1935, F 6; 1940, 96; 1941, 91; 1948, 179.
- Cedar Creek, *see* Crouse Creek (Greenwood).
- Cedar Creek (Quesnel)—1875, 14; 1883 to 1891, in tables; 1902, 60; 1921, 116; 1922, 118, 125; 1923, 127; 1924, 126; 1927, 172; 1928, 197; 1929, 203; 1930, 172; 1931, 92; 1932, 111; 1934, C 34; 1935, C 37; 1942, 89; 1943, 84; 1945, 127; 1946, 200; 1947, 195; 1948, 178.
- Cedar Creek, tributary to Tulameen River (Similkameen)—1886, 214; 1887, 277; 1893 to 1895, in tables; 1933, 174.
- Chehalis (Lincoln) Creek (called Munro on early maps and Chehalis by Geographic Board) (Atlin)—1906, 55; 1907, 52; 1908, 49; 1909, 52; 1910, 54; 1911, 59; 1912, 59; 1913, 70; 1914, 78; 1915, 62; 1916, 45; 1917, 79; 1918, 100; 1919, 90; 1920, 73; 1928, 122; 1930, 127; 1932, 72; Bull. 1, 1933, 30.
- Cherry Creek (Vernon)—1874 to 1895, in tables; 1874, 15; 1876, 410, 423; 1877, 404; 1879, 241; 1881, 398; 1882, 362; 1886, 213; 1887, 277; 1889, 291, 292; 1890, 378; 1891, 575; 1892, 543; 1893, 1073; 1894, 753; 1895, 706; 1901, 1127; 1905, 192; 1914, 359, 360; 1920, 187; 1921, 196; 1922, 145; 1923, 160; 1925, 184; 1926, 200; 1927, 213; 1930, 208; 1931, 116; 1934, D 34; 1935, D 15; 1940, 97; 1941, 91; Bull. 2, 1930, 53.
- Chilcotin River (Clinton)—1880, 428; 1881, 396, table; 1882, 361, table; 1883, table; 1912, 192.
- Chindemash Creek (Omineca)—1901, 996, 997.
- China Cabin Creek (Quesnel)—1938, C 30.
- China Creek (Alberni)—1893, 1080, map; 1895, 647; 1896, 3; 1897, 566; 1899, 778, 785; 1910, 151; 1921, 207; 1936, F 25; Bull. 2, 1930, 61.
- China Creek (Cariboo)—1901, 951; 1902, 93, 117; 1904, 46; 1905, 55; 1906, 42; 1907, 40; 1908, 43; 1912, 51; 1914, 53; 1915, 55; 1927, 166; 1929, 198.
- Chisholm Creek (Cariboo)—1874, 1877 to 1891, 1894 to 1895, in tables; 1875, 10; 1886, 236; 1893, 1037; 1902, 104; 1914, 64; 1915, 55; 1916, 38; 1917, 128, 138; 1918, 130; 1933, 132.
- Churn Creek (Clinton)—1921, 195; 1932, 155; 1933, 186; 1938, F 70; Placer Bull. 1943, 17.
- Clearwater River (Kamloops)—1898, 1100; 1899, 727, 736; 1900, 888, 894.
- Coffee Creek, *see* Cafe Creek (Cariboo).
- Collins Gulch (Similkameen)—1885, 494; 1886, 214, table; 1887, 277; 1888, 317, table; 1889, 293, table; 1908, 132; 1926, 230.
- Columbia River (Revelstoke)—1875, 16; 1879, 242; 1882, 362; 1884, 422; 1885, 498, 500; 1886, 202; 1888, 303, 306, 308; 1889 to 1890, in tables; 1891, 565; 1894, 747; 1895, table; 1896, 535; 1899, 611, 670; 1905, 149; 1913, 115; 1914, 279; 1920, 151; 1934, E 34; 1935, E 36; 1939, 110.
- Conklin Gulch (Cariboo)—1875 to 1899, in tables; 1902, 103; 1927, 166.
- Consolation Creek, not Consolidation Creek (Atlin)—1896, 534; 1904, 57, 96; 1905, 78; 1906, 55; 1907, 52; 1908, 49; 1909, 52; 1910, 54; 1913, 70; 1914, 78; 1915, 62; 1917, 79; 1927, 110, 115; 1928, 122; 1932, 73; 1945, 124; 1946, 195; Bull. 1, 1933, 30.
- Cooper Creek (Cariboo)—1886, 235; 1912, 50; 1913, 57; 1939, 106; 1940, 91; 1941, 86; 1947, 123; 1949, 241.
- Coquihalla River (New Westminster)—1875, 17; 1879, 243; 1881, 398; 1907, 143; 1909, 143; 1911, 183; 1912, 186; 1914, 363; 1915, 253, 256; 1926, 198; 1931, 115; 1933, 177.
- Cottonwood River (Cariboo)—1874 to 1895, in tables; 1874, 5; 1878, 373; 1883, 402, 403; 1885, 380; 1890, 360; 1893, 1037; 1894, 726; 1896, 508, 509, 514; 1897, 472; 1898, 979, 981; 1899, 609; 1901, 954; 1902, 60, 64, 104, 125; 1904, 44; 1920, 99; 1921, 113; 1922, 120; 1932, 99; 1935, C 37; 1936, C 17, C 20, C 22; 1944, 78; 1945, 126; 1946, 197; 1947, 194; 1948, 177; 1949, 231.
- Coulter Creek (Cariboo)—1874, 1876 to 1880, in tables; 1876, 418; 1885, 487; 1901, 957; 1902, 104; 1926, 169; 1931, 86; 1935, C 36; 1944, 77; 1946, 196; 1947, 191; 1948, 175; Bull. 26, 1948, 60; 1949, 241.
- Cowichan River (Victoria)—1895, 649.
- Cracker Creek (Atlin)—1909, 52; 1914, 78; 1915, 62; 1916, 45; 1917, 78; 1918, 99; 1919, 90; 1921, 84; 1932, 72; 1933, 90; 1935, B 28; Bull. 1, 1933, 29.
- Criss Creek (early name Chris) (Kamloops)—1893, 1068; 1916, 265; 1933, 183.
- Crossing (Galena) Creek (Kamloops)—1913, 213, 215.
- Crouse (Cedar) Creek (Greenwood)—1896, 578; 1931, 129.

Cunningham Creek (Cariboo)—1874, 5, 6, table; 1875, 12; 1876, 418; 1877, 394, 397; 1879, 237; 1882, 355, 357; 1883, 402; 1885, 381; 1886, 196, 229; 1887, 256; 1888, 291; 1896, 508; 1897, 465, 473; 1899, 609; 1901, 962; 1902, 60, 94, 103, 117; 1903, 59; 1904, 47; 1905, 56; 1906, 43; 1907, 40; 1908, 43; 1921, 112; 1922, 120; 1923, 122; 1924, 114; 1925, 147, 149; 1926, 173; 1927, 166; 1929, 199; 1930, 164; 1931, 88; 1932, 103; 1933, 134; 1944, 78; 1945, 126; 1947, 192; 1948, 176.

Davenport Creek (Atlin)—1910, 54; 1912, 60; 1913, 70; 1914, 78; 1915, 62; 1916, 45; 1917, 79; 1918, 100; 1920, 73; 1921, 84.

Davis Creek (Cariboo)—1874 to 1895; in tables; 1874, 5; 1877, 398; 1902, 104.

Deadman River (Kamloops)—1879, 242; 1893, 1068; 1899, 735; 1933, 183; 1935, F 57.

Deadtimber (Deadwood) Creek (Cariboo)—1876 to 1888, in tables; 1902, 104.

Deadwood Creek, *see* Deadtimber Creek (Cariboo).

Dease Creek (Stikine)—1874, 4, 8, 9, 10; 1875, 4, 6; 1876, 411, 413, 415, 416, 417; 1877 to 1889, in tables; 1877, 400; 1879, 239; 1880, 427; 1881, 395; 1882, 360; 1883, 410; 1884, 420; 1885, 490; 1886, 200; 1887, 259; 1888, 295; 1889, 278; 1892 to 1895, in tables; 1892, 530; 1893, 1040; 1894, 735; 1895, 664; 1897, table; 1900, 720, 783; 1901, 987; 1902, 42; 1903, 48; 1905, 77; 1906, 58; 1907, 55; 1908, 53; 1911, 62; 1912, 63, 80; 1913, 75; 1914, 99; 1915, 68; 1916, 48; 1917, 75, 82; 1918, 102; 1919, 84; 1920, 69; 1921, 72, 75; 1922, 88; 1924, 75; 1925, 111; 1926, 102; 1929, 117; 1930, 120; 1931, 53; 1933, 63; 1941, 84; 1942, 84; 1943, 81; Bull. 1, 1931, 47.

Deep Creek, *see* Peachland Creek (Vernon).

Deep Creek, *see* Umitiy Creek (Cariboo).

Defot Creek (Stikine)—1878, 375, table; 1879, 238, table; 1880, 427, table; 1884, 421, table; 1885, 490, table; 1886, table; 1919, 85.

Deloire Creek (Stikine)—(1874, means Frances River, Yukon); 1884 to 1886, in tables; 1913, 76; 1915, 68; 1916, 48; 1917, 82; 1919, 85; 1920, 69; 1921, 74; 1922, 88; 1923, 88; 1925, 111; 1926, 103.

Deloire River, *see* Liard River (Stikine).

Deloire River (also used for tributary to Thibert Creek, called Little Deloire) (Stikine)—1911, 62; 1912, 79.

Dennis Creek (Stikine)—1879, 1882, 1884, in tables.

Devils Canyon, *see* Devils Lake Creek (Cariboo).

Devils Lake Creek (Devils Canyon) (Cariboo)—1884 to 1895, in tables; 1884, 418; 1898, 978; 1921, 112; 1922, 119; 1923, 121; 1926, 168, 169; 1927, 167; 1930, 164; 1932, 101; 1935, C 36; 1938, C 52; 1943, 82; 1944, 77; 1945, 125; 1946, 196; 1947, 191; 1948, 175; 1949, 241; Bull. 26, 1948, 60.

Dixon Creek (Kamloops)—1900, 893; 1912, 184; 1930, 197; 1934, D 26.

Dog Creek (Clinton)—1880, 428; 1883, 411; 1897, 558; 1899, 727.

Dog Creek (Omineca)—1931, 80; 1932, 87.

Dominion Creek (Atlin)—1900, 775; 1901, 983; 1932, 69; 1933, 87; Placer Bull. 1943, 11.

Donovan (Poorman) Creek (Cariboo)—1882, 1895, in tables; 1910, 44; 1925, 147; 1927, 168; 1928, 194; 1930, 165; 1931, 85; 1932, 100; 1933, 132; 1935, C 36; 1939, 106; 1940, 93; 1941, 88; 1942, 87; 1945, 126; 1946, 198; 1947, 193.

Douglas Creek, tributary to Kitsumgallum River (Skeena)—1886, 201, table; 1914, 106, 107; 1918, 49; 1923, 48; 1924, 48; 1925, 70; 1926, 73; 1927, 65; 1930, 76; 1931, 36; 1932, 51; 1933, 45; 1934, B 11; Bull. 1931, 47; Bull. 1, 1933, 25.

Dragon Creek (Cariboo)—1876 to 1883, in tables; 1881, 393; 1883, 402; 1896, 506, 508, map; 1902, 97, 101, 104; 1921, 112; 1927, 167; 1928, 194; 1929, 200; 1930, 164; 1931, 87, 89; 1932, 101; 1933, 134; 1938, C 51; 1939, 106; 1940, 92; 1941, 87.

Dream Creek, tributary to Silver Creek (Omineca)—1924, 111.

Dry Gulch (Cariboo)—1930, 164; 1932, 101; 1933, 132.

Duck Creek, *see* Rollie Creek (Quesnel).

Dunbar Flat (Cariboo)—1881, 391, 393; 1882, 356; 1884, 418; 1896, 509; 1910, 43; 1942, 86; 1943, 83; 1944, 78; 1946, 197.

Duncan River (Revelstoke)—1888, 301; 1892, 532; 1893, 1046; 1895, 680; 1896, 88, 542; 1935, E 36.

Dunn Creek (Kamloops)—1927, 192.

Dutch Creek (Golden)—1884, table; 1885, 498, table; 1887, 270; 1931, 139; 1933, 201; 1935, E 36.

Duteau (Jones) Creek (Vernon)—1936, D 44.

Eagle Creek, *see* Britton Creek (Similkameen).

Eagle Creek, *see* Houseman Creek (Cariboo).

Eagle River (Stikine)—1897, 505; 1928, 120.

O'Donnell River (Atlin)—1898, 987, 988; 1903, 43; 1904, 90; 1905, 73; 1906, 54; 1907, 51; 1908, 49; 1911, 59; 1912, 59; 1913, 71; 1914, 82; 1915, 63; 1916, 45; 1917, 79; 1918, 100; 1919, 87, 91; 1920, 73; 1921, 82, 84; 1926, 109; 1929, 123; 1932, 65; 1933, 83; 1936, B 59; 1937, B 37, B 44; 1938, B 29; 1939, 103; Bull. 1, 1931, 44.  
Olivine (Slate) Creek (Similkameen)—1885, 494; 1886, 214, table; 1887, 277, table; 1888, 317, table; 1889, 293, table; 1890, 380, table; 1891, 576, table; 1892, table; 1893, 1078; 1894, 758, table; 1897, 610; 1899, 740; 1900, 900; 1907, 144; 1926, 230; 1930, 215; 1931, 203; 1934, D 23; 1949, 244.  
Omineca River (Omineca)—1874, 8; 1897, 5, 11, 13; 1898, 983, 984; 1899, 636; 1902, 104; 1912, 115; 1913, 108; 1914, 175.  
Oregon Gulch (Cariboo)—Bull. 26, 1948, 32.  
Osilinka River (Omineca)—1898, 983, 984; 1932, 87.  
Otter Creek (Atlin)—1899, 646, 649, 653; 1900, 775, 779; 1901, 983; 1902, 36, 40; 1903, 42, 46; 1904, 90; 1905, 73; 1906, 53, 57; 1907, 51, 53; 1908, 48, 52; 1909, 51; 1910, 53; 1911, 58; 1912, 59; 1913, 70; 1914, 78; 1916, 45; 1917, 75, 78; 1918, 96, 99; 1919, 90; 1920, 72; 1921, 75, 82, 84; 1922, 89; 1926, 109; 1927, 115; 1928, 122; 1929, 121, 427; 1931, 66; 1932, 71; 1933, 89; 1936, B 59; 1938, B 30; 1939, 103; 1940, 88; 1941, 83; 1942, 84; 1945, 124; 1948, 172; 1939, 239; Bull. 2, 1930, 19; Bull. 1, 1931, 38.

Palmer Bar Creek (Fort Steele)—1874, 14, table; 1876, 424; 1881, 399; 1883, 413; 1885, 498; 1887, 270; 1888, 306; 1889, 285; 1893, 1063; 1930, 246; 1933, 205; 1935, E 36; 1937, E 43.

Palmer (Faulkner) Creek (Stikine)—1925, 111; 1933, 72.

Parsnip River (Omineca)—1897, 518; 1901, 976; 1906, 106, 117; 1928, 182.

Peace River (Peace River)—1881, table; 1897, 511, 518; 1906, 103; 1909, 86; 1910, 89; 1915, 79; 1916, 88; 1917, 141; 1921, 118; 1923, 143; 1926, 164.

Peachland (Deep) Creek (Vernon)—1934, D 34; 1935, D 15.

Peers Creek (New Westminster)—1914, 363; 1915, 257; 1926, 198; 1927, 211; 1930, 205 (Pierre); 1933, 178.

Pend d'Oreille River (Nelson)—1935, E 36; 1938, E 34, E 45; 1939, 110; 1940, 97.

Perkins Creek (Perkins Gulch) (Cariboo)—1877 to 1881, 1883, 1885, 1888 to 1890, 1892 to 1895, in tables; 1910, 44; 1911, 50; 1915, 56; 1916, 39; 1918, 130, 145; 1919, 106; 1922, 119; 1923, 122; 1927, 167; 1949, 242; Bull. 26, 1948, 58.

Perry Creek (Fort Steele)—1874 to 1894, in tables, except 1883, 1884, 1887, 1893; 1874, 14; 1876, 424; 1877, 403; 1878, 378; 1880, 429; 1881, 399; 1882, 362; 1883, 413; 1885, 498; 1886, 206; 1889, 285; 1892, 534; 1894, 746; 1895, 671, 672; 1896, 505, 517, 522; 1898, 1013; 1901, 1006; 1903, 26, 78, 94; 1905, 141; 1906, 132; 1915, 114; 1918, 150, 188; 1919, 119; 1920, 116, 140; 1921, 126; 1927, 267; 1933, 205; 1934, E 32; 1935, E 36.

Peters Creek (Cariboo)—1876 to 1891, in tables, except 1881; 1878, 373; 1887, 256; 1888, 292; 1901, 955; 1902, 104; 1905, 53; 1908, 42; 1909, 45; 1910, 43; 1911, 49; 1921, 113; 1922, 120; 1924, 115; 1939, 109; 1940, 93; 1945, 126; 1946, 200.

Philip Creek (Omineca)—1930, 159.

Pine Creek (Atlin)—1895, 657; 1898, 986; 1899, 611, 644, 649, 653; 1900, 756, 772, 779; 1901, 981, 982; 1902, 22, 31, 32, 38, 40; 1903, 19, 26, 38, 39, 44, 46; 1904, 60, 63, 84, 94; 1905, 69, 75; 1906, 50; 1907, 49, 53; 1908, 46, 52; 1909, 49; 1910, 21, 52; 1911, 56; 1912, 55, 57; 1914, 75; 1915, 59; 1916, 43; 1917, 75, 76; 1918, 96, 97; 1919, 86, 88; 1920, 71; 1921, 75, 83; 1922, 89; 1924, 80; 1925, 117; 1926, 109; 1927, 115; 1928, 122; 1929, 122; 1930, 124; 1932, 69; 1933, 87; 1936, B 41; 1937, B 44; 1938, B 29; 1939, 103; 1940, 88; 1941, 83; 1942, 83; 1946, 194; 1948, 172; Bull. 2, 1930, 20; Bull. 1, 1931, 33.

Pine Creek, *see* Pinus Creek (Cariboo).

Pine Creek, *see* Nigger Creek (Quesnel).

Pinus (Pine) Creek (Cariboo)—1891, 1892, in tables; 1927, 169; 1929, 199; 1943, 83; 1944, 78; 1945, 126; 1946, 201; 1947, 192; 1948, 175; 1949, 234.

Pleasant Valley Creek (Cariboo)—1896, 510.

Poison Mountain Creek (Clinton)—1933, 186.

Poorman Creek, *see* Donovan Creek (Cariboo).

Poormans Creek (Stikine)—1884 to 1886, in tables; 1889, 278.

Poplar Creek (Revelstoke)—1908, 101; 1914, 286.

Poquette Creek (Quesnel)—1891, 562, table; 1892, table; 1897, 482; 1929, 203; 1932, 111; 1933, 141; 1946, 201.

Porcupine Creek (Golden)—1888, 306, table; 1889, 284, table.

Porcupine Creek (Omineca)—1931, 79.

Porcupine Creek (Stikine)—1879, table.

Porcupine Creek, *see* Yeoward Creek (Vernon).

Pundata Creek (Cariboo)—1948, 175; 1949, 241.

Putnam Creek (Vernon)—1936, D 48.

Quartz Creek (Golden)—1884, table; 1888, 306, table; 1889, 285; 1890, 371; 1892, 535; 1899, 610; 1926, 239; 1927, 264; 1929, 292; 1935, E 36.

Quartz Creek (Omineca)—1898, 984; 1913, 109; 1933, 107; 1936, C 39; 1938, C 54; 1940, 90.

Quartz Creek (Stikine)—1875, 4, 6, table; 1876, 412, 414; 1888, 295; 1889, table; 1899, 610; 1925, 112; 1931, 61; 1932, 64; 1947, 189.

Quesnel River (Quesnel)—1874, 5; 1876, 420, table; 1879, 237; 1880, 424, 426; 1881, 392, 394; 1882, 356, 358; 1883, 402; 1885, 380, 384; 1886, 225, 226; 1887, 256, 258; 1888, 294; 1890, 360, 362; 1894, 725, 726, 732; 1895, 655 to 659; 1896, 508, 510, 516; 1898, 976, 981, 982; 1899, 609; 1901, 954, 969; 1903, 65; 1904, 48; 1905, 59; 1909, 48; 1910, 50; 1911, 52; 1913, 62; 1917, 133; 1920, 99; 1922, 124; 1929, 203; 1930, 170; 1934, C 33; 1936, C 40; 1939, 108; 1940, 95; 1941, 89; 1944, 79; 1945, 126; 1946, 199; 1947, 194; 1948, 178; 1949, 229, 230, 243; Bull. 2, 1930, 43.

Quesnel River, South Fork (Quesnel)—1874 to 1876, 1879 to 1895, in tables; 1890, 360, 362; 1891, 559, 562; 1892, 526, 529; 1894, 732; 1895, 658, 659; 1896, 515; 1897, 472; 1900, 738; 1902, 76; 1903, 69; 1904, 51; 1905, 59; 1907, 42; 1926, 176; 1927, 177; 1928, 200; 1929, 204; 1930, 173.

Quesnel River, North Fork, *see* Cariboo River (Quesnel).

Rainbow Creek (Omineca)—1930, 159; Bull. 1, 1931, 82.

Reddish Creek (Cariboo)—1944, 79.

Red Gulch (Cariboo)—1877, 398; 1879, table; 1883 to 1894, in tables; 1885, 487; 1937, C 36; 1938, C 51; 1939, 105; 1940, 91; 1941, 85; 1942, 85; 1943, 82; 1944, 77; 1946, 197.

Rock Creek (Greenwood)—1874, 3; 1875 to 1895, in tables, except 1880, 1882, 1885 to 1887; 1889, 292; 1890, 379; 1891, 576; 1892, 543; 1893, 1073; 1894, 753; 1896, 576; 1899, 611, 774; 1901, 1146; 1903, 169; 1912, 168; 1922, 177; 1926, 210; 1930, 222; 1931, 126; 1932, 131; 1933, 162; 1934, D 12; 1935, D 15; 1938, D 26, D 29; 1939, 111; 1940, 97; 1941, 91.

Rollie (Duck) Creek (Quesnel)—1945, 127; 1948, 179.

Rose Creek (Atlin)—1898, 986; 1914, 77; 1939, 102.

Rose Gulch (Quesnel)—1886, 226; 1896, 515; 1897, 482; 1898, 982; 1902, 83; 1925, 159; 1926, 176.

Rosella (Bear) Creek (also called Rosetta) (Stikine)—1876, 414; 1879, 1882, 1884 to 1886, 1894, 1895, in tables; 1894, 735; 1899, 610; 1902, 43; 1905, 78; 1906, 61.

Rouchon (Ruchon, Rushon) Creek (Cariboo)—1876, table; 1878, table; 1889, 274; 1892, table; 1895, table; 1902, 104; 1942, 88; 1943, 82; 1944, 76; 1945, 125; 1946, 197; 1947, 192.

Rover Creek (Nelson)—1890, 364.

Ruby Creek (Atlin)—1898, 987; 1899, 646; 1903, 42; 1904, 70, 89; 1905, 72; 1907, 51, 53; 1908, 52; 1909, 51; 1910, 53; 1911, 57; 1912, 58; 1913, 70; 1914, 77, 86; 1915, 61; 1916, 45; 1917, 75, 78; 1918, 96, 99; 1919, 87, 89; 1920, 72; 1921, 75, 81, 83; 1922, 88; 1923, 90; 1924, 80; 1925, 117; 1926, 109; 1927, 115; 1928, 122; 1929, 121; 1930, 124; 1932, 70; 1933, 89; 1936, B 59; 1937, B 45; 1938, B 29; 1939, 103; 1940, 89; 1941, 83; 1945, 124; 1946, 195; 1947, 188; 1948, 172; Bull. 1, 1931, 35.

St. Mary River (Fort Steele)—1874, table; 1892, 535; 1893, 1066, map; 1935, E 36.

Salmo River (Nelson)—1902, 154 (Salmon River); 1903, 142; 1926, 282 (Salmon River); 1935, E 36.

Salmon River (Kamloops)—1879; 242; 1896, 565.

San Juan River (Victoria)—1932, 201.

Sauchi (Sowchea) Creek (Omineca)—1934, C 15.

Sawflat Creek (Sawmill Flat) (Cariboo)—1885, 381; 1898, 978; 1901, 960; 1902, 93; 1929, 199; 1935, C 36; 1948, 176; 1949, 242.

Sawmill Creek (Fort Steele)—1935, E 36, G 53; 1949, 242.

Scotch Creek (Kamloops)—1885, 496; 1886, 212, table; 1887, 276, table; 1895, 696; 1896, 565; 1897, 613; 1898, 1101; 1933, 195; 1936, D 49.

Scottie Creek (Kamloops)—1902, 198.

Seymour River (Kamloops)—1907, 133.

Shepherd Creek (Cariboo)—1892 to 1894, in tables; 1892, 527; 1893, 1038; 1894, 727; 1895, 657; 1898, 976; 1899, 609; 1900, 736; 1914, 53; 1915, 55; 1916, 38; 1926, 167; 1927, 167; 1928, 194; 1929, 199; 1940, 91; 1941, 86; 1943, 83; 1947, 191; 1948, 175; 1949, 234.

Shuswap River (Vernon)—1931, 116.

Shuttle Island (Skeena)—1918, 41, 105; 1919, 40; 1922, 42.

Sibola Creek (Omineca)—1913, 108; 1914, 233.

Silver Creek (Atlin)—1912, 60; 1913, 67; Bull. 19, 1944, 44.

Similkameen River (Similkameen)—1885, 1888 to 1895, in tables; 1911, 180; 1912, 183; 1926, 232; 1947, 198; 1948, 180; 1949, 228; Bull. 2, 1930, 54.

Siwash Creek (New Westminster)—1875, 17; 1877, 406; 1891, 575, 'e; 1892, 542; 1893, 1069, 1072; 1895, 699, table; 1896, 569; 1899, 743; 1900, 905; 190 '6; 1903, 186; 1904, 236; 1906, 177; 1910, 130; 1911, 183; 1913, 218; 1915, 253, 260; 1916, 264; 1921, 196; 1925, 182; 1926, 198; 1930, 205.

Siwash Creek (Similkameen)—1928, 264; 1931, 131; 1933, 174; 1934, D 23.

Siwash Creek, *see* Naswhito Creek (Vernon).

Six Mile Creek (Cariboo)—1876, 419; 1886, 228.

Skagit River (New Westminster)—1879, 244; 1932, 158; 1933, 177.

Skaret Creek (Cariboo)—1932, 92; 1941, 89.

Skeena River (Omineca)—1898, 1152; 1932, 86.

Skookumchuck Creek (Fort Steele)—1931, 141; 1935, E 36.

Slade Creek (Cariboo)—1940, 93; 1941, 88; 1949, 241.

Slate Creek, *see* Feather Creek (Atlin).

Slate (Wilson) Creek, tributary to O'Donnell River (Atlin)—1898, 988; 1899, 647; 1906, 54, 57; 1907, 51, 53; 1908, 49, 52; 1909, 52; 1910, 54; 1911, 58; 1912, 59; 1913, 71; 1914, 78; 1919, 86, 91; 1920, 73; 1933, 83; 1936, B 59, B 60; 1937, B 45; 1948, 173; Placer Bull. 1943, 12.

Slate Creek (Omineca)—1874, table; 1875, 15, table; 1879, 244; 1881 to 1883, in tables; 1897, 511; 1898, 984; 1899, 634; 1901, 972; 1903, 71; 1907, 75; 1913, 109; 1924, 109; 1925, 144; 1928, 181; 1929, 205; 1933, 104, 111; 1935, C 38; 1936, C 39; 1937, C 34; 1938, C 53; 1941, 84; 1942, 84; 1948, 174; 1949, 239; Bull. 2, 1930, 48.

Slate Creek, *see* Olivine Creek (Similkameen).

Slough Creek (Cariboo)—1879, 237; 1880, table; 1881, 391; 1882, table; 1883, 402; 1884, 417, 418; 1885, 488; 1891, 560; 1892, 526, table; 1894, 726, table; 1895, 657, table; 1896, 506, 508; 1897, 471, 493; 1898, 975, 976, 978; 1899, 609, 626; 1902, 95, 121; 1904, 44; 1905, 54; 1907, 39; 1913, 56; 1914, 52, 63; 1917, 137; 1920, 98; 1921, 112; 1922, 119; 1923, 122; 1926, 168;

- 1927, 167; 1928, 194; 1930, 164; 1935, C 36; 1937, C 36; 1938, C 51; 1939, 106; 1940, 92; 1941, 87 (Ketch, Ltd.); 1942, 86 (Ketch, Ltd.); 1945, 125; 1946, 196; 1948, 175; 1949, 241; Bull. 26, 1948, 59.
- Smith or Kirbyville Creek*, *see Gaffney Creek (Revelstoke)*.
- Snake Creek (Atlin)—1899, 646; 1903, 43; 1904, 90.
